How Customers Think Essential Insights Into The Mind Of The Market Hardcover:

How Customers Think Gerald Zaltman, 2003 Despite the time and money spent on market research 60% to 80% of new offerings fail **Lovemarks** Brian Sheehan, 2013-05-28 In 2004 Kevin Roberts wrote *Lovemarks* the future beyond brands It was admired by many as a breakthrough in marketing thinking but was also controversial because of its surprisingly obvious thesis that emotional connections are at the heart of sustained relationships between producers retailers and consumers While many companies were using the language of war in their marketing target penetrate ambush Roberts was using the language of love mystery sensuality intimacy He explained in simple terms what people are often loath to admit we make decisions with our emotions over our reason *Lovemarks* described the journey by which brands could move from consumer respect based on intellect to consumer love based on emotion and in return gain loyalty beyond reason In 2010 *Advertising Age* magazine named *Lovemarks* one of their ideas of the decade while noting that the roadmap for brands to achieve Lovemark status was still not entirely clear *Lovemarks* How the world's top marketers make emotional connections to win in the marketplace adds to the original *Lovemarks* by showcasing real world business examples and outlining the roadmaps followed by several world renowned brands to achieve Lovemark status Procter Gamble Toyota Visa General Mills Miller T Mobile and Lenovo are just a few examples of businesses winning in the marketplace through the application of the *Lovemarks* theory maintaining laser like focus on making and sustaining emotional connections with consumers *Lovemarks* features 20 case stories from clients and markets worldwide in widely varying categories My book shows that *Lovemarks* thinking works anywhere anytime All it takes is having the brains to implement it the guts to see it through and an abiding faith in emotion as your compass says Brian Sheehan **Loyalty cards in the apparel industry in Germany and Spain:**

Is the implementation of a global marketing approach reasonable when operating both in a Southern and a Northern European country? Sarah-Mailin Janotta, 2014-02-01 Internationally operating apparel retailers are expanding throughout Europe Noordhoff et al 2004 Seock and Lin 2011 To be able to cope with the fierce competition in the apparel retail industry many retailers have implemented loyalty cards in order to keep current customers Several retailers have opted for a global marketing strategy which includes implementing loyalty cards with the same features in several countries e.g. Hunkemöller Promod Esprit This research is a comparative analysis of young adults aged between 18 and 30 from a Northern European country Germany and a Southern European country Spain The objective is to determine if there are significant differences in attitudinal and behavioural patterns as well as in preferences regarding the features of loyalty cards in the consumers of the two countries to find potential success factors for retailers In the first place international apparel retailers have to decide which marketing approach they intend to follow This may be either a standardised etic marketing approach which aims to have one overall marketing strategy for all countries or a non standardised emic marketing approach which aims to adapt the marketing strategy in every country to the local culture Trommsdorff 2009 Solomon et al 2002

Research of consumer behaviour has shown that consumers are influenced by external stimuli political economic social technological and consumer characteristics cultural social personal Foscht and Swoboda 2005 Kotler et al 2009 Marketers have to be aware of these external influences in order to develop marketing strategies that appeal to the target market s By making use of the right marketing instruments customer satisfaction and loyalty and subsequently long term profitability can be established Seock and Lin 2011 Loyal customers have been shown to be more profitable to the company than continuously acquired new customers Reichheld and Teal 2001 In the literature the distinction between attitudinal and behavioural loyalty is widely spread and it will also be upheld in this research One instrument often used in relationship marketing is the promotional tool of loyalty cards A mann et al 2008 There are different forms of loyalty cards which differ in loyalty card type in loyalty card functions and in target groups Steffens 2010 The image and efficacy of loyalty cards are highly controversial in the literature Recent research Shape-Shifting Capital George González,2015-05-20 Shape Shifting Capital Spiritual Management Critical Theory and the Ethnographic Project is positioned at the intersection of anthropology critical theory and philosophy of religion First Gonz lez explores the phenomena of workplace spirituality in a language that is accessible to a general readership Taking contemporary trends in organizational management as a case study he argues by way of a detailed ethnographic study of practitioners of workplace spirituality that the conceptual and institutional boundaries between religion science and capitalism are being redrawn by theologized management appropriations of tropes borrowed from creativity theory and quantum mechanics Second Gonz lez makes a case for a critical anthropology of religion that combines existential concerns for biography and intentionality with poststructuralist concerns for power arguing that the ways in which the personalization of metaphor bridges personal and social histories also helps bring about broader epistemic shifts in society Finally in a postsecular age in which capitalism itself is explicitly and confidently spiritual Gonz lez suggests that it is imperative to reorient our critical energies towards a present day evaluation of postmodern capitalism s boundary blurring Gonz lez further argues that the kind of existential deconstruction performed by what he calls existential archeology can serve the needs of any social criticism of neoliberal religion and corporate spirituality
