Kellam,2011-02-14 When parents turn to the parenting self help section of their local bookstore they are looking for both practical guidance and a childrearing philosophy that resonates with them an approach they can relate to and be comfortable implementing in their own household In The Parent Survival Guide From Chaos to Harmony in Ten Weeks or Less Theresa

Kellam presents a way to strengthen the relationship with the child that simultaneously promotes the parent's own emotional healing and wellness. Grounded in a research-supported therapeutic technique that uses structured play time as the catalyst for interpersonal connection and growth, Kellam's model is subtle in its simplicity. Through a series of guided exercises, Kellam gives parents the skills they need to begin to set aside special playtimes with their children during which the most important part of the process is simply being there in a way that promotes healing, growth, and communication. The beauty of this approach is that in only 30 minutes once a week, the results can be seen in only a few weeks. Features of the book include Parent Survival Tip at the start of each chapter. Original cartoon illustrations bring text to life. Short but insightful worksheet questions bring focus to the program. The Parent Survival Guide is structured over a series of 10 chapters which can be read in conjunction with the 10 sessions of the CPRT workshops for those parents enrolled in a formal filial training program. But the material in the book is designed to be read and implemented by anyone. The author is not only a licensed psychologist and filial therapist but she has also gone through the program with her own son and continues to rely on its principles within her family.

Her message is that Any student can use simple straightforward strategies to start making A's in their courses and enjoy a lifetime of deep effective learning. In a conversational tone and liberally illustrated by anecdotes of past students, the author combines introducing readers to concepts like Bloom's Taxonomy to illuminate the difference between studying and learning, fixed and growth mindsets, as well as to what brain science has to tell us about rest, nutrition, and exercise together with such highly specific learning strategies as how to read a textbook, manage their time, and take tests.
