HCI is a field of study that researches designs and develops software solutions that solve human problems. This book will help you understand various aspects of the software development phase from planning and data gathering through to the design and development of software solutions. The book guides you through implementing methodologies that will help you build robust software. You will perform data gathering, evaluate user data, and execute data analysis and interpretation techniques. You will also understand why human-centered methodologies are successful in software development and learn how to build effective software solutions through practical research processes. The book will even show you how to translate your human understanding into software solutions through validation methods and rapid prototyping leading to usability testing. Later you will understand how to use effective storytelling to convey the key aspects of your software to users. Throughout the book you will learn the key concepts with the help of historical figures, best practices, and references to common challenges faced in the software industry. By the end of this book you will be well-versed with HCI strategies and methodologies to design effective user interfaces. What you will learn: Become well-versed with HCI and UX concepts. Evaluate prototypes to understand data gathering, analysis, and interpretation techniques. Execute qualitative and quantitative methods for establishing humans as a feedback loop in the software design process. Create human-centered solutions and validate these solutions with the help of quantitative testing methods. Move ideas from the research and definition phase into the software solution phase. Improve your systems by becoming well-versed with the essential design concepts for creating user interfaces. Who this book is for: This book is for software engineers, UX designers, entrepreneurs, or anyone who is just getting started with user interface design and looking to gain a solid understanding of human-computer interaction and UX design. No prior HCI knowledge is required to get started.

Mobile

Human-Computer Interaction - Mobile HCI 2004 Stephen Brewster, Mark Dunlop, 2004-09-01 MobileHCI is a forum for academics and practitioners to discuss the challenges and potential solutions for effective human computer interaction with mobile systems and services. It covers the design, evaluation and application of techniques and approaches for all mobile computing devices and services. MobileHCI 2004 was the sixth in the series of conferences that was started at Glasgow University in 1998 by Chris Johnson. We previously chaired the conference in 1999 in Edinburgh as part of INTERACT 1999 and in 2001 in Lille as part of IHM HCI 2001. The last two years saw the conference move to Italy first under the chairmanship of Fabio Paternò in Pisa then under Luca Chittaro in Udine. In 2005 the conference will move to Austria to be chaired by Manfred Tscheligi. Each year the conference has its own website hosted by the conference chair; however the address www.mobilehci.org will always point to the next or current conference. The number of submissions has increased every year. This year we received 79 full papers, 63 were received last year from which we accepted the best 25. We had 81 short papers and posters submitted, 59 last year and accepted 20 of these as short papers and 22 as posters. We received 9 workshop, 4 tutorial and 2 panel proposals from which 5, 2 and 2 respectively were accepted.
