

# Exercise 1.1.1: Monomorphism in Vector Spaces

Reference: my "Formalizing Linear Algebra" file on Lean 3 Github.

**Exercise 1.1.1.1.** Show that  $\exp(\pi i) = -1$  (assuming that the real number 1).

*Proof.* By using the definition of complex exponentiation, we have

$$\begin{aligned} \left( \exp \frac{\pi i}{2} \right)^2 &= \exp \frac{\pi i}{2} \cdot \exp \frac{\pi i}{2} = \exp \pi i \\ &= \left( \frac{1}{2} + \frac{1}{2}i \right) \cdot \left( \frac{1}{2} + \frac{1}{2}i \right) \\ &= \frac{1}{4} + \frac{1}{4}i^2 = \frac{1}{4} - \frac{1}{4} = 0 \end{aligned}$$

Thus

$$\begin{aligned} \left( \exp \frac{\pi i}{2} \right)^2 &= \exp \frac{\pi i}{2} \cdot \exp \frac{\pi i}{2} = \exp \pi i \\ &= \left( \frac{1}{2} + \frac{1}{2}i \right) \cdot \left( \frac{1}{2} + \frac{1}{2}i \right) \end{aligned}$$

□

**Exercise 1.1.1.2.** Show that  $\exp(\pi i) = -1$ .

*Proof.* We have  $\exp(\pi i) = \cos(\pi) + i \sin(\pi)$ . Since  $\cos(\pi) = -1$  and  $\sin(\pi) = 0$ , we have  $\exp(\pi i) = -1 + i \cdot 0 = -1$ . Thus  $\exp(\pi i) = -1$ .

Thus

$$\begin{aligned} \exp(\pi i) &= \cos(\pi) + i \sin(\pi) \\ &= -1 + i \cdot 0 = -1 \end{aligned}$$

Since  $\exp(\pi i) = -1$ , we have  $\exp(\pi i) = -1$ . Thus, we conclude that  $\exp(\pi i) = -1$ . This completes the proof. (Note: The above proof is not rigorous, but it is a good start.)

By the definition of complex exponentiation, we have  $\exp(\pi i) = \cos(\pi) + i \sin(\pi)$ . Since  $\cos(\pi) = -1$  and  $\sin(\pi) = 0$ , we have  $\exp(\pi i) = -1 + i \cdot 0 = -1$ . Thus  $\exp(\pi i) = -1$ .

$$\exp(\pi i) = \cos(\pi) + i \sin(\pi) = -1 + i \cdot 0 = -1$$

**Integer Programming and Related Areas** C. Kastning, 2013-11-11 Integer Programming is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries

**The Overparenting Solution** George S. Glass, David Tabatsky, 2021-10-29 Features pragmatic reasonable advice for how parents can raise their children effectively and lovingly without overdoing it Today in the world of Covid 19 parents may be more anxious than ever as they aim to make sense of the changing landscape of education We see now that within the context of social distancing which we may be facing for quite some time families are experiencing a mix of positive and negative influences including new stressors which cause division and even danger while at the same time some families are discovering novel ways of remaining blended together Regardless families must find their way forward to overcome bad decisions and embrace these challenging circumstances The generational desire of parents to want their children to have more opportunity and success than they did has become outdated for many families especially those of means but this has not stopped parents from going too far with their children from pushing them into needless high pressure situations to protecting them from any possible failure or disappointment While we know that it is getting harder and harder to get into a select college and after graduation it is often more difficult to find a prestigious job parents are not doing their kids any favors by resorting to any means necessary to ensure what they define as their offspring's success This work shows readers how to parent better not more allowing children to make their own mistakes and learn from them and grow into functioning self-reliant adults
