**The Oxford Handbook of African Archaeology** Peter Mitchell, Paul Lane, 2013-07-04 Africa has the longest and arguably the most diverse archaeological record of any of the continents It is where the human lineage first evolved and from where Homo sapiens spread across the rest of the world Later it witnessed novel experiments in food production and unique trajectories to urbanism and the organisation of large communities that were not always structured along strictly hierarchical lines Millennia of engagement with societies in other

parts of the world confirm Africa's active participation in the construction of the modern world while the richness of its history ethnography and linguistics provide unusually powerful opportunities for constructing interdisciplinary narratives of Africa's past. This Handbook provides a comprehensive and up to date synthesis of African archaeology covering the entirety of the continent's past from the beginnings of human evolution to the archaeological legacy of European colonialism. As well as covering almost all periods and regions of the continent it includes a mixture of key methodological and theoretical issues and debates and situates the subject's contemporary practice within the discipline's history and the infrastructural challenges now facing its practitioners. Bringing together essays on all these themes from over seventy contributors many of them living and working in Africa it offers a highly accessible contemporary account of the subject for use by scholars and students of not only archaeology but also history anthropology and other disciplines.

**Global Social Archaeologies** Koji Mizoguchi, Claire E Smith, 2019-06-27 Global Social Archaeologies contributes to the active engagement of contemporary social archaeology through addressing issues such as postcolonialism, community heritage and Indigenous rights. This authoritative volume authored by the current and past presidents of the World Archaeological Congress introduces readers to the various theoretical and methodological tools available for the investigation of the past. Taking into account the implications for contemporary societies it offers a new framework for social archaeologies in a globalised world. By combining new data from their research with an innovative synthesis and analysis of leading research by others the authors have developed fresh conceptualisations and understandings of archaeology as a social practice and of the ways in which it simultaneously straddles the past present and future. Exploring a range of case studies and enhanced by a wealth of illustrations Global Social Archaeologies highlights a new approach to archaeology one that places human rights at the core of archaeological theory and practice.
