Teaching Artistic Research Ruth Mateus-Berr, Richard Jochum, 2020-05-05 With artistic research becoming an established paradigm in art education several questions arise How do we train young artists and designers to actively engage in the production of knowledge and aesthetic experiences in an expanded field How do we best prepare students for their own artistic research What comprises a curriculum that accommodates a changed learning making and research landscape And what is the difference between teaching art and teaching artistic research What are the specific skills and competences a teacher should have Inspired by a symposium at the University of Applied Arts Vienna in 2018 this book presents a diversity of well reasoned answers to these questions

[Defining Digital Humanities](#) Dr Edward Vanhoutte, 2013-12-23 This reader brings together the essential readings that have emerged in Digital Humanities It provides a historical overview of how the term Humanities Computing developed into the term Digital Humanities and highlights core readings which explore the meaning scope and implementation of the field To contextualize and frame each included reading the editors and authors provide a commentary on the original piece There is also an annotated bibliography of other material not included in the text to provide an essential list of reading in the discipline

[Passwords](#) Brian Lennon, 2018-02-26 Cryptology the science of ciphers and codes and philology the study of languages are typically understood as separate domains But Brian Lennon contends that computing's humanistic applications no less

than its technical ones are marked by the priorities of security and military institutions devoted to fighting wars and decoding intelligence

The Transformative Humanities Mikhail Epstein, 2012-10-11 Distinguished scholar Mikhail Epstein offers a reassessment of the role of the humanities and advocates their constructive potential for the society and intellectual culture of the future In his famous classification of the sciences Francis Bacon not only catalogued those branches of knowledge that already existed in his time but also anticipated the new disciplines he believed would emerge in the future the desirable sciences In this open access publication Mikhail Epstein echoes in part Bacon's vision and outlines the desirable disciplines and methodologies that may emerge in the humanities in response to the new realities of the twenty first century Are the humanities a purely scholarly field or should they have some active constructive supplement We know that technology serves as the practical extension of the natural sciences and politics as the extension of the social sciences Both technology and politics are designed to transform what their respective disciplines study objectively The Transformative Humanities A Manifesto addresses the question Is there any activity in the humanities that would correspond to the transformative status of technology and politics It argues that we need a practical branch of the humanities which functions similarly to technology and politics but is specific to the cultural domain The ebook editions of this book are available open access under a CC BY NC ND 4.0 license on bloomsburycollections.com

Just in Time Teaching Scott Simkins, Mark Maier, 2023-07-03 Just in Time Teaching JiTT is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand using an online course management system While the phrase just in time may evoke shades of slap dash work and cut corners JiTT pedagogy is just the opposite It helps students to view learning as a process that takes time introspection and persistence Students who experience JiTT come to class better prepared and report that it helps to focus and organize their out of class studying Their responses to JiTT questions make gaps in their learning visible to the teacher prior to class enabling him or her to address learning gaps while the material is still fresh in students minds hence the label just in time JiTT questions differ from traditional homework problems in being designed not only to build cognitive skills but also to help students confront misconceptions make connections to previous knowledge and develop metacognitive thinking practices Students consequently spend more time on course concepts and ideas but also read their textbooks in ways that result in more effective and deeper learning Starting the class with students work also dramatically changes the classroom learning environment creating greater student engagement This book demonstrates that JiTT has broad appeal across the academy Part I provides a broad overview of JiTT introducing the pedagogy and exploring various dimensions of its use without regard to discipline Part II of the book demonstrates JiTT's remarkable cross disciplinary impact with examples of applications in physics biology the geosciences economics history and the humanities Just in Time Teaching article from The Hispanic Outlook in Higher Education Reprinted with permission from Hispanic Outlook in Higher Education Magazine www.hispanicoutlook.com
