IB Geography Garrett Nagle, 2013 **Learning to Teach Geography in the Secondary School** Mary Biddulph, David Lambert, David Balderstone, 2015-05-20 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps you acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and challenging lessons It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at Masters level Key chapters explore the fundamentals of teaching and learning geography Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school based initial teacher education in mind Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective reflective teachers Praise for previous editions of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses Educational Review **Water**

Security Bruce Lankford, Karen Bakker, Mark Zeitoun, Declan Conway, 2013-10-15 The purpose of this book is to present an overview of the latest research policy practitioner academic and international thinking on water security an issue that like water governance a few years ago has developed much policy awareness and momentum with a wide range of stakeholders As a concept it is open to multiple interpretations and the authors here set out the various approaches to the topic from different perspectives Key themes addressed include Water security as a foreign policy issue The interconnected variables of water food and human security Dimensions other than military and international relations concerns around water security Water security theory and methods tools and audits The book is loosely based on a masters level degree plus a short professional course on water security both given at the University of East Anglia delivered by international authorities on their subjects It should serve as an introductory textbook as well as be of value to professionals NGOs and policy makers

Rebuilding After Disasters Gonzalo Lizarralde, Cassidy Johnson, Colin Davidson, 2009-09-10 Disasters are not natural

Natural events such as earthquakes floods hurricanes etc become disasters because of the fragile relations that exist between the natural human and built environments Sadly major disasters will always occur in towns and cities in the developing world where resources are limited people are vulnerable and needs are particularly great The prevailing state of emergency challenges thoughtful and sustainable planning and construction Yet it is possible in theory and in practice to construct them in a way that provides a sustainable environment and improved conditions for current and future generations Rebuilding After Disasters emphasizes the role of the built environment in the re establishment of lives and sustainable livelihoods after disasters Expert contributors explain the principal challenges facing professionals and practitioners in the building industry This book will be of great value to decision makers students and researchers in the fields of architecture social sciences engineering planning geography and disaster recovery
