**Personnel Economics in Sports** Neil Longley, 2018 This book examines personnel economics within the context of the professional sport industry. Sport is an effective industry in which to empirically test theories of personnel economics primarily because the employer-employee relationship in sport is much more visible and transparent than in almost any other industry. Researchers benefit from having data on a host of variables pertaining to individual employees, i.e., players, such as their age, race, national origin, and experience. Researchers also have data on each employee's performance, on their salary, and on who their co-workers, teammates, and managers/coaches are. The chapters are organized around the core functional areas of personnel economics and cover all aspects of the employment relationship in sport, from recruiting and selection to pay and performance to work team design. Each chapter contains a thorough literature review that provides the reader with a sense of the breadth and depth of the work being done in the area and with a sense as to how the literature can move forward both in a sport and non-sport context. The book is suitable for an advanced undergraduate course right through to a PhD level field course in both management and economics. Academic researchers in the fields of sports economics, personnel economics, human resource management, strategic management, and sport management will also find the book of interest. Contributors include D. Berri, C. Deutscher, B. Frick, L. H. Kahane, N. Longley, J. G. Maxcy, J. Prinz, R. Simmons, D. Weimar.

M. McDermott, 2017-01-23 This book argues that economic activity in the public sphere now underwrites private corporations and rejects rigid adherence to traditional economic theories that no longer apply Adam Smith's widely used merchant's model assumes that most investment is private

when in fact research demonstrates that public investment in the workforce through education and training far outweighs the private sector and does not account for the growing presence of consensual pricing the diversification of modern businesses or the increasing internal authoritarianism of globalizing companies With de facto public support for these adaptations undermining the universally presumed economic model private corporations are able to increase their profits while misrepresenting the investment of their own global labor forces This book suggests an economy of laws solution that balances the needed degree of central investment planning with the continuation of our pluralist economy of largely autonomous firms principally by extending the full rights of citizens into the workplace itself

**Labor Economics in an Islamic Framework** Toseef Azid, Umar Burki, Muhammad Junaid Khawaja, Nasim Shah Shirazi, Muhammad Tahir, 2021-12-30 The labor market in Islam is governed by the Islamic laws of fairness justice and reward that is equivalent to the job done Most of the literature in the field discusses the normative aspect of the labor market whereas few attempts can be seen to address more positive aspects There is a need for new theoretical and empirical models for the Islamic labor market which should differ from established approaches This book provides a comprehensive overview of the nature scope and dimensions of the labor market in an Islamic context from both theoretical and practical perspectives It presents and discusses labor economics and then compares the similarities and differences between conventional and Islamic views of the labor market explaining where they meet and critically justifying why they differ under the umbrella of Shari ah The book raises pertinent issues which it analyzes from both standpoints and widens the discourse to include norms morality and related institutions such as social security and welfare A unique feature of the book is that it examines labor economics practices among a specific group of countries and studies the labor conditions within these countries where the majority of the population follow the teachings of

Islam in their daily lives The book proposes practical strategies for the development of new models for the Islamic labor market which are compatible with the modern world The book will enable academics and practitioners of Islamic economics to make economic sense of Shari ah compliance and human resource development
