Studies of Identity in the 2008 Presidential Campaign Robert E. Denton Jr., 2010-06-14 To simply say the 2008 presidential election was historic seems like an understatement The election was unique in many ways beyond the selection of the nation's first African American as President The drama of the election was also heightened by the historic nomination battle between Hillary Clinton and Barack Obama The contest generated issues of race and gender throughout the campaign as did the candidacy of Sarah Palin as the Republican Vice Presidential nominee And John McCain brought his own unique qualities to the campaign Vietnam War hero long term Congressional service record feisty temperament and the oldest first time presidential candidate to run for the Presidency Thus issues of race gender and age dominated the campaign both implicitly and explicitly The candidacies of Clinton Obama McCain and Palin provided the context and dynamics for charges of racism sexism and ageism

Studies of Identity in the 2008 Presidential Campaign explores issues of identity politics and the presidential election Investigating all aspects of race gender or ageism the contributors to this volume address the role and function of identity politics in political campaigns and highlight challenges of identity politics in contemporary political campaigns

Political Exercise Lawrence D. Brown, 2022-03-08 The public health benefits of giving city dwellers increased opportunities to lead physically active lifestyles are well known to urban planners public health scholars and government officials Moreover increases in active living such as walking and cycling help the environment support local businesses and reduce traffic congestion among other advantages But despite wide agreement that active living is both achievable and valuable best practices are not easy to implement In *Political Exercise* Lawrence D Brown presents five case studies of cities that have promoted active living with varying success through a range of approaches He shows how and why the transformation of a call for public intervention into projects programs and policies is inescapably political Brown argues that in order to implement policies that support active living their proponents must give communities a sense of ownership of recommended changes in the built environment filter the public health agenda through a range of public and private organizations and secure committed political champions At the intersection of public health and urban planning *Political Exercise* offers a framework for scholars policy makers and reformers to more productively address both the rationales behind active living and the political strategies that spur change

Japan's Sea Lane Security Euan Graham, 2005-11-16 This is the first major English language study to explore the broad

and longstanding connections between Japan's national security and the safety of its sea lanes. Tracing issues from pre and post 1945 eras, the book explores how Japan's concerns with sea lane protection have developed across such diverse fields as military strategy, diplomacy, trade policy, energy security and law enforcement. Drawing upon case study material and primary research including interviews with officials and security analysts, the book presents a chronological analysis of Japan's sea lane security. While Japan's security policies have recently undergone relatively rapid change, a historical treatment of sea lane security issues reveals long term continuity in security policymakers' perceptions and responses regarding Japan's defence and foreign policy. Revealing a neglected but important aspect of Japan's military and economic security, the book investigates why officials and analysts continue to portray the defence of Japan's sea lanes as a matter of life and death.

The book comprises historical analyses, systematization of concepts, manifestos and social evaluations, and above all, an alignment of new objectives, curricular plans and pedagogical methodologies. **The**

Routledge International Handbook of Young Children's Rights Jane Murray, Beth Blue Swadener, Kylie

Smith, 2019-10-28 Written to commemorate 30 years since the United Nations Convention on the Rights of the Child (UNCRC), The Routledge International Handbook of Young Children's Rights reflects upon the status of children aged 0-8 years around the world, whether they are respected or neglected, and how we may move forward. With contributions from international experts and emerging authorities on children's rights, Murray, Blue Swadener and Smith have produced this highly significant textbook on young children's rights globally. Containing sections on policy, along with rights to protection, provision and participation for young children, this book combines discussions of children's rights and early childhood development and investigates the crucial yet frequently overlooked link between the two. The authors examine how policy, practice and research could be utilised to address the barriers to universal respect for children, to create a safer and more enriching world for them to live and flourish in. The Routledge International Handbook of Young Children's Rights is an essential resource for students and academics in early childhood education, social work and paediatrics, as well as for researchers, policymakers, leaders and practitioners involved in the provision of children's services and paediatric healthcare, and international organisations with an interest in, or ability to influence, national or global policies on children's rights.
