Kim, Dongchul Son, 2005-12-12 PASCOS is an interdisciplinary symposium on the interface of Particle physics String theory and Cosmology Over the past two decades these three disciplines have increasingly become closer Historically there was always a strong overlap between particle physics and cosmology This connection has become even stronger with the realization that some of the fundamental issues in cosmology such as the presence of dark matter and dark energy may possibly find a resolution only via new theories of particle physics At the same time string theory has begun to play an increasingly important role in particle physics as a possible framework for building unified models of particle interaction including gravity In recent years we have seen an increasing overlap between cosmology and string theory and currently the area of string cosmology is one of the most active fields of research PASCOS 2005 aimed to provide coherent discussions of recent developments on the interface of the three disciplines and also on their interconnections In particular superstring aspects in low energy particle theory SUSY and cosmological applications moduli stabilization are extensively covered in this volume Topics include dark matter and dark energy baryogenesis flavor and CP violation neutrino physics supersymmetry and extra dimensions flux compactification string model building as well as brane cosmology Electromagnetic Response of Atomic Nuclei Sigfrido Boffi, 1996 In this book the authors present the basic formalism to describe the electromagnetic field and its interaction with nuclear matter Among the areas studied are pion production polarization phenomena and photonuclear reactions at intermediate energies At a time when data will become

available from many newly commissioned laboratories both in Europe and the USA this book offers a timely presentation of the current understanding of the electromagnetic response of atomic nuclei Its introductory approach and rich bibliography will make it invaluable to postgraduate students and researchers
