Pohokar, Dr. Sunil Ramchandra Gupta, Prof. Priyanka Anant Chorey, Prof. Sonika Anant Chorey, Obstructive Marketing Maitland Hyslop, 2016-05-23 In Obstructive Marketing Maitland Hyslop deals with a very negative kind of activity which embraces activities legal or otherwise designed to prevent or restrict the distribution of a product or service temporarily or permanently against the wishes of the product manufacturer service provider or customer When the author defined this phenomenon as Obstructive Marketing and started to research it more than a decade ago it was seen as a valid concept that was perhaps ahead of its time The World has moved on and in the era of globalization a study of this negative aspect of marketing is now required Obstructive Marketing is now seen as the business equivalent of asymmetric warfare which is increasingly understood because the rise of the South and East at the expense of the North and West has brought some Obstructive Marketing stratagems into sharp focus Using the author's own research this book explains what Obstructive Marketing is and why it is not called Anti Marketing The author explains who practises Obstructive Marketing where when and how and why businesses are particularly vulnerable when entering new markets and engaging in change and innovation Intriguing concepts such as cultural risk are illuminated along with formal links between Obstructive Marketing asymmetric warfare and terrorism This all leads to identification of the need for a strong Government Business partnership to counter the effects of this darkest kind of marketing **Selected Papers from SDEWES 2017: The 12th Conference on**

Global Threats, Global Futures Thayer Scudder, 2010-01-01 A work of political economy from the perspective of an anthropologist who has made a career of studying poverty and displaced people *Global Threats Global Futures* will prove rewarding reading for anyone concerned with issues of economic development environmental and cultural degradation and the causes and solutions of poverty Most of all Thayer Scudder illuminates a path not only possible but plausible through a destructive maze of humankind's own making if only the political will can be found to tread it

Engineering Science Thayer Scudder is one of those gifted authors who have the experience and the vision to span multiple sectors and far flung sites in assessing where humankind and its habitat are heading His restless curiosity in everything around him has led him to become not simply the world's leading authority on the impacts on the lives of people resettled by dam building projects but an innovative thinker about development anthropology and the threats to the globe from poverty fundamentalism in all its pernicious forms and environmental degradation This iconoclastic book assails sacred cows ranging from the World Bank to the malign role of Buddhist priests in the late civil war in Sri Lanka The work is not reassuring But its conclusion that humans can learn to live with declining living standards is more uplifting than doom laden

David McDowell Former Director General of the IUCN and New Zealand Ambassador to the United Nations Neither Pollyanna nor Prophet of Doom Professor Scudder has drawn on his 55 years of international experience and presented a clear hard hitting extraordinarily well documented analysis of the critical and urgent global challenges that face humankind and of the transformations that will be required to meet those challenges This is a very important book It should be read by an informed public but most particularly by leaders and policy makers of the world's governments international organizations educational and religious institutions

Lee Talbot George Mason University US This is an extraordinary bold and exceptionally well thought out prospectus on the next century of the human condition Declining living standards consequential to the pervasive pursuit of growth in terms of

Gross Domestic Product is a central theme that is thoroughly documented and engagingly articulated. The decisive role in the decline of living standards played by global threats including poverty, fundamentalism, environmental degradation, wars, and excess consumption is compellingly presented from the perspective of the author's unique career. Burton Singer, Princeton University, US. This impressive study of the progressive impoverishment of the world's resources speaks with the authority of Thayer Scudder's fifty years of experience with international programs for technological development, especially those that involve river basin development and resulting population displacement and resettlement. Case studies from different continents provide the evidence for the likelihood that the majority in future generations will lead more meager lives than their twentieth-century ancestors. He points to what has gone wrong in our approach to the world and its resources and to the measures necessary to offset the damage already caused. If only citizens have the political will to adopt them. Elizabeth Colson, University of California, Berkeley, US. This is an important book. It has to be listened to and for two reasons. The first is the expertise of the author: the guy has been there; this is an anthropologist who is constantly in the field. And he possesses a wide range of skills: part ethnographer, part biologist, as much a humanist as a scientist. The combination of experience and expertise is as powerful as it is unusual. Sadly, a second force in favor of this book is the temper of the times. The giddiness of the last century has been driven underground by the perils of this Ro
