Japanese connections in chemistry had a major impact on the institutionalization of scientific and technological higher education in Japan from the late nineteenth century and onwards. They helped define the structure of Japanese scientific pedagogical and research system that lasted well into the post World War II period of massive technological development when it became one of the biggest providers of chemists and chemical engineers in the world next to Europe and the United States. In telling this story *Anglo American Connections in Japanese Chemistry* explores various sites of science education such as teaching laboratories and classrooms where British and American teachers mingled with Japanese students to shed new light on the lab as a site of global human encounter and intricate social relations that shaped scientific practice. **The**

**Electrician**, 1897      **Engineering**, 1877      *A Textbook of Technical Drawing (WBSCTE)* Sankar Prasad Dey, The subject Technical Drawing has been introduced in the 1st semester of all branches in state polytechnics under the West Bengal State Council of Technical Education with modifications as per model syllabus issued by the All India Council for Technical Education with effect from 2013-2014 session. This book has been written according to the new syllabus framed by the West Bengal State Council of Technical Education for Diploma Engineering Technology level. It covers all the features of the entire syllabus of Technical Drawing. **SALIENT FEATURES** All problems are explained in details. Examples are given on each topic along with drawings. All drawings are made using AutoCAD software. Short questions and answers are given to facilitate understanding. Exercises included on each topic.

**Industrial Training and Technological Innovation** Howard Gospel, 2010-11 Taking an international and comparative perspective, this book focuses on the relationship between industrial training and technological change in three major global economies: the UK, USA and Japan. The contributors, an international group of leading researchers, look at the origins and development of training in these countries and analyse the benefits resulting from the interaction of a skilled workforce and technological change. This analysis of training in major industrial nations reveals the full complexity of the relationship between labour and technological change. It shows the value of an approach which is both historical and comparative and highlights the importance of education and training as a necessary basis for successful innovation. *Directory - The*
