Life Stories Maureen O'Connor, 2011-08-23 Memoirs autobiographies and diaries represent the most personal and most intimate of genres as well as one of the most abundant and popular. Gain new understanding and better serve your readers with this detailed genre guide to nearly 700 titles that also includes notes on more than 2,800 read-alike and other related titles. The popularity of this body of literature has grown in recent years and it has also diversified in terms of the types of stories being told and persons telling them. In the past, readers' advisors have depended on access by names or Dewey classifications and subjects to help readers find autobiographies they will enjoy. This guide offers an alternative organizing the literature according to popular genres, subgenres, and themes that reflect common reading interests. Describing titles that range from travel and adventure classics and celebrity autobiographies to foodie memoirs and environmental reads. **Life Stories: A Guide to Reading Interests in Memoirs, Autobiographies, and Diaries** presents a unique overview of the genre that specifically addresses the needs of readers' advisors and others who work with readers in finding books.

Smelling Land David Sanborn Scott, 2008 Resolving the escalating issues surrounding climate destabilization will be one of the most important environmental challenges we face this century. Dr. David Sanborn Scott, one of Canada's foremost energy experts, clearly demonstrates that we have only one real choice: Hydrogen. Using literate, lay-accessible, sometimes lyrical but never trivial explanations, **Smelling Land** gives a clear and comprehensive examination of the architecture of civilization's energy systems, the critical role of energy currencies, and the widespread blunders when this role is not recognized. How to evaluate environmental intrusion and general principles for environmental gentility. The mechanisms and status of climate disruption. Sustainability and the REASONS for a coming Hydrogen Age. Energy source options to identify realistic expectations and expose myths. The wonders of hydrogen systems from airplanes to cars, submarines, laptop computers, mobile phones, and heart pacers. How fast we can get to the Hydrogen Age if we wake up to the true severity of the climate risk, why, and what it will be like.

Our Human Herds: The Theory of Dual Morality (Second Edition, Unabridged) Stephen Martin Fritz, 2019-05-14 Let us imagine that somewhere in present-day South America a nation exists as the United States was constituted in 1789: George Washington is its president and Thomas Jefferson its secretary of state. It is a nation that allows only white males to vote and its president, cabinet officials, and many of its citizens own slaves. If the America of 1789 existed right now, what would we think of it? Would it be right to invade it in order to liberate its people? Would we consider a complete embargo of it until it changed its ways? Would it be a pariah among nations? Or would we recognize and cooperate with it, declaring its president and secretary of state political geniuses? Maybe we would just do nothing and trust that in 100 or so years it will straighten itself out. What would be the correct way to think of such a nation and its leaders? Three hundred years ago, if a woman was raped and became pregnant, we'd kill the rapist and spare the baby. Today we spare the rapist and kill the baby. One hundred years ago, only heterosexual marriages were legal. Today political leaders around the world are celebrating gay relationships. How and why

does our moral outlook change in such matters By the time you are done reading this book you will have concrete answers to these questions and many more This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its pages fly by Studies as brilliant as this one deserve a far wider audience An engrossing and mind expanding examination of morality Kirkus Reviews *Solar System* , *The Sun, Planets, and Dwarf Planets* ,
