It comprehensively unpacks central themes in the field including international jurisdiction, recognition and enforcement, and scrupulously analyses core debates whilst addressing legislative and policy issues. **The Yale Law School Guide to Research in American Legal History** John B. Nann, Morris L. Cohen, 2018-06-19 The study of legal history has a broad application that extends well beyond the interests of legal historians. An attorney arguing a case today may need to cite cases that are decades or even centuries old, and historians studying political or cultural history often encounter legal issues that affect their main subjects. Both groups need to understand the laws and legal practices of past eras. This essential reference is intended for the many nonspecialists who need to enter this arcane and often tricky area of research. *Comparative Law* Mathias Siems, 2018-04-12 Comparative Law offers a thorough grounding in the subject for students and scholars of comparative law alike. Critically debating both traditional and modern approaches to the subject and using examples from a range of legal systems gives the reader a truly global perspective. Covering essential academic debates and comparative law methodology, its contextualised approach draws on examples from politics, economics and development studies to provide an original contribution to topics of comparative law. This new edition is fully revised and updated throughout to reflect contemporary research, contains more examples from many areas of law, and there is also an increased discussion of the relevance of regional, international, transnational and global laws for comparative law. Suitable for students taking courses in comparative law and related fields, this book offers a fresh, contextualised and cosmopolitan perspective on the subject. *Global Legal Indicators and Comparative Law* Daniele D'Alvia, Matteo Nicolini, 2025-06-30 In recent times, comparative law has moved towards a new type of visualisation of the law which is mainly based on indexes and indicators. Through these, legal scholars and practitioners measure legal systems against specific benchmarks; they no longer search for commonalities among legal systems but are interested in assessing how the law performs in economic terms. This book critically analyses this quantitative turn in comparative law. The work focuses on the role played by social indicators in general and legal indicators in particular in contemporary societies. It presents the evaluation of indicators as a pattern of governance as well as a driver promoting a change in the law from outside. The authors explore a range of issues including how and why the quantitative turn in comparative law has taken place, how legal indicators are created and for which purposes, whether indicators really act as a new form of legitimisation and law making, and if so, if it is possible to resist or challenge their power, whether it is fair and equitable to measure the performance of diversified national legal frameworks through such managerial tools of governance, and ultimately how legal indicators change the way we conceive of the law. The book addresses these issues by focusing on legal indicators whose global ambitions are often related to societal concerns. To

this extent it examines how both non economic and economic global indicators might have some bearing on the law The volume will be of interest to advanced students researchers and academics in comparative law global law transnational law constitutional law and law and economics *The Evolution and Future of International Arbitration* Stavros Brekoulakis, Julian D.M. Lew, 2016-06-24 The School of International Arbitration of the Centre for Commercial Law Studies at Queen Mary University of London celebrated its 30th anniversary in April 2015 with a major conference featuring presentations by 35 international arbitration practitioners and scholars from many countries representing a variety of legal systems This volume has emerged from that conference What is striking is not only the range and diversity of the topics examined but also the emergence of new subjects for examination demonstrating that arbitration law and practice do not stand still but are constantly evolving The issues and topics covered include the following Evolution of case law and practice in international arbitration The concept and autonomy of arbitral award Parties in international arbitration Parallel proceedings in international arbitration Court review of arbitration awards Geographic expansion of international arbitration Counsel regulation and conflicts disclosures The use of technology in international arbitration Teaching and research in international arbitration This superbly organised and edited volume like earlier conference volumes from the School of International Arbitration is sure to be welcomed and acclaimed and like them will prove of lasting value **Empirics and Consumer Law in Changing Markets** Gitta Veldt, Kimia Heidary, Vanessa Mak, 2025-08-11 This book evaluates the impact of empirical research on regulation in contemporary consumer markets It combines findings from a breadth of disciplines focusing on their implications for legal frameworks and policies Bringing together leading experts in the field the book translates empirical insights into policies and explores digitalization in the consumer law domain This title contains one or more Open Access chapters *Idea and Methods of Legal Research* P. Ishwara Bhat, 2019-09-05 Legal research examines subject matter enshrouded in social circumstances in order to conceptualize theories and prepare a future course of action This dynamic inter disciplinary and labyrinthine character of legal research requires researchers to be fluid eclectic and analytical in their approach Idea and Methods of Legal Research unearths how the thinking process is to be streamlined in research how a theme is built on the basis of comprehensive and intensive study and the paths through which notions of objectivity feminism ethics and purposive character of knowledge are to be understood The book first explains the meaning evolution and scope of legal research and discusses objectivity and ethics in legal research It engages with the requirements advantages and limits of various doctrinal and non doctrinal methods and tools and the points to be considered in selecting a suitable method or combination of methods It highlights analytical historical philosophical comparative qualitative and quantitative methods of legal research The book then goes on to discuss the use of multi method legal research policy research action research and feminist legal research and finally reflects on research based critical legal writing as opposed to client related legal writing This book thus is a comprehensive answer to key questions one faces in legal research **A**
