Hanninen, 2012 This book introduces a theory of music analysis that one can use to explore aspects of segmentation and associative organization in a wide range of repertoire including Western classical music from the Baroque to the present with potential applications to jazz and popular music and some non Western musics Rather than a methodology the theory provides analysts with precise language and a broad flexible conceptual framework through which they can formulate and investigate questions of interest and develop their own interpretations of individual pieces and passages The theory begins with a basic distinction among three domains of musical experience and discourse about it the sonic psychoacoustic the contextual or associative sparked by varying degrees of repetition and the structural guided by a specific theory of musical structure or syntax invoked by the analyst A comprehensive presentation of the theory with copious musical illustrations is balanced with close analyses of works by Beethoven Debussy Nancarrow Riley Feldman and Morris Dora A Hanninen is professor of music theory at the University of Maryland She received the 2010 Outstanding Publication Award from the Society for Music Theory **Analyses of Nineteenth- and Twentieth-century Music, 1940-1985** , 1987 Provides rapid access to technical materials of an analytical nature contained in periodicals monographs Festschriften and dissertations Cumulates the 19th century and 20th century volumes previously published separately and updates indexing for both centuries through 1985 Contains 5 664 entries by 2 400 authors drawn from 132 periodicals and 93 Festschriften covering 779 composers **Expressive Intersections in Brahms** Heather Platt, Peter H. Smith, 2018-11-01 This exceptionally fine collection brings together many

of the best analysts of Brahms and nineteenth century music generally in the English speaking world today Nineteenth Century Music Review Contributors to this exciting volume examine the intersection of structure and meaning in Brahms's music utilizing a wide range of approaches from the theories of Schenker to the most recent analytical techniques They combine various viewpoints with the semiotic based approaches of Robert Hatten and address many of the most important genres in which Brahms composed The essays reveal the expressive power of a work through the comparison of specific passages in one piece to similar works and through other artistic realms such as literature and painting The result of this intertextual re framing is a new awareness of the meaningfulness of even Brahms's most absolute works Through its unique combination of historical narrative expressive content and technical analytical approaches the essays in Expressive Intersections in Brahms will have a profound impact on the current scholarly discourse surrounding Brahms analysis Notes
