Our Schools Suck Jeanne Theoharis, Gaston Alonso, Noel S. Anderson, Celina Su, 2009-05-01 Shares the voices of students speaking out against the failures of urban education Our schools suck This is how many young people of color call attention to the kind of public education they are receiving In cities across the nation many students are trapped in under funded mismanaged and unsafe schools Yet a number of scholars and of public figures have shifted attention away from the persistence of school segregation to lambaste the values of young people themselves Our Schools Suck forcefully challenges this assertion by giving voice to the compelling stories of African American and Latino students who attend under resourced inner city schools where guidance counselors and AP classes are limited and security guards and metal detectors are plentiful and grow disheartened by a public conversation that continually casts them as the problem with urban schools By showing that young people are deeply committed to education but often critical of the kind of education they are receiving this book highlights the dishonesty of public claims that they do not value education Ultimately these powerful student voices remind us of the ways we have shirked our public responsibility to create excellent schools True school reform requires no less than a new civil rights movement where adults join with young people to ensure an equal education for each and every student

Impact and the Management Researcher Usha C.V. Haley, 2021-10-07 Universities governments faculty evaluation committees grant bestowing institutions scholars and accreditation organizations have increasingly insisted on identifying and placing value on research impact Valuation of research and scholarly output predicts innovation affects careers and guides resource allocations worldwide This book joins the burgeoning conversation in management and the social sciences with theoretical and applied discussions of the concepts measurements costs and benefits that accrue to pursuing scholarly impact The author draws on a pioneering study by the Academy of Management that asked its global membership of 20 000 how they assessed scholarly impact including rankings
