Lumbar Spinal Imaging in Radicular Pain and Related Conditions J.T.

Wilmink, 2010-02-08 A general consensus exists that lumbosacral nerve root compression is the primary cause of sciatica and neurogenic claudication although humoral and vascular factors certainly play a role as well This book focuses on imaging the various ways in which nerve root compression can come about and determining which anatomic features are reliably associated with the production of radicular pain After a discussion of the nature of radicular pain and related symptoms spinal imaging techniques and options are reviewed with emphasis on the role of MR myelography in assessing the intradural nerve roots A chapter on normal topographic sectional and functional radiologic anatomy is followed by presentations on pathologic anatomy addressing mechanisms of nerve root compression and on pre and postoperative imaging Features relevant to prediction of the natural history are discussed and a section is devoted to the performance and reporting of a spinal imaging study

Image-Guided Spine Interventions John M. Mathis, 2006-05-07

The field of interventional radiology is constantly undergoing change and its procedures evolve over time There is currently tremendous pressure on our specialty as cardiology and vascular surgery appropriate existing vascular interventions We need to be looking constantly for new procedures that will replace this loss In the 1980s the introduction of vascular access provided new procedures that included the placement of temporary venous catheters ports tunneled catheters and dialysis maintenance As a result of vascular access the number of procedures performed in some interventional labs doubled The same revolution is occurring again with the advent of image guided spine intervention Five percent of the American population at any one time has back pain This huge patient population is seeking help for this disabling and persistent problem Image Guided Spine Interventions describes the varied and numerous procedures that are available to the image guided interventionist who may provide these therapies for the spine This book embraces clinical evaluation pharmacological requirements procedural recommendations and a spectrum of procedures that will be of interest to the image guided spine interventionist It covers a broad range of material

that is presented by experts in each field including discography intradiscal electrothermal therapy IDET percutaneous discectomy vertebroplasty and ballon kyphoplasty epidural steroid injections lective nerve root blocks and autonomic nerve blockade diagnostic epidurography and therapeutic epidurolysis sacroiliac and facet joint injections implanted drug delivery systems and epidural blood and fibrin patches for CSF leaks
