ACCCN's Critical Care Nursing Leanne Aitken, Andrea Marshall, Wendy Chaboyer, 2016-01-04. With each edition ACCCN's Critical Care Nursing has built on its highly respected reputation. Its contributors aim to encourage and challenge practising critical care nurses and students to develop world-class critical care nursing skills in order to ensure delivery of the highest quality care. Endorsed by the Australian College of Critical Care Nurses (ACCCN), this 3rd edition presents the expertise of foremost critical care leaders and features the most recent evidence-based research and up-to-date advances in clinical practice, technology, procedures and standards. Expanded to reflect the universal core elements of critical care nursing practice, authors Aitken, Marshall and Chaboyer have retained the specific information that captures the unique elements of contemporary critical care nursing in Australia, New Zealand and other similar practice environments. Structured in three sections, ACCCN's Critical Care Nursing 3rd Edition addresses all aspects of critical care nursing, including patient care and organisational issues, while highlighting some of the unique and complex aspects of specialty critical care nursing practice, such as paediatric considerations, trauma management and organ donation. Presented in three sections: Scope of Critical Care, Principles and Practice of Critical Care, Speciality Practice. Focus on concepts that underpin practice: essential, physical, psychological, social and cultural care. New case studies elaborate on relevant care topics. Research vignettes explore a range of topics. Practice tips highlight areas of care particularly relevant to daily clinical practice. Learning activities support knowledge, reflective learning and understanding. Additional case studies with answers available on Evolve. NEW chapter on Postanaesthesia recovery. Revised coverage of metabolic and nutritional considerations for the critically ill patient. Aligned

[The Genesis of Germs](#) Alan Gillen, 2007. As the world waits in fear, the CDC and world health organizations race to minimize the current pandemic, a looming threat that has forced international, federal and local governments to deal with COVID19 and other future epidemics and the widespread death and devastation which would follow. Will the world find the answers in time? Or will we see a deadly threat ravage populations as others have before in 1918 with influenza in the late 18th century with yellow fever or the horrific black death or bubonic plague in 1347 AD? Are these viruses examples of evolution? Did God make microbes by mistake? Are they accidents of evolution out of the primordial soup? These timely questions are examined throughout this book from chapter 1. It seems that a new and more terrible disease is touted on the news almost daily. The spread of these scary diseases from avian flu to SARS to AIDS is a cause for concern and leads to questions such as: Where did all these germs come from? How do they fit into a biblical world view? What kind of function did these microbes have before the Fall? Does antibiotic resistance in bacteria prove evolution? How can something so small have such a huge deadly impact on the world around us? Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book. He shows

how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ
