Annihilation Jeff VanderMeer, 2015 For 30 years Area X has remained mysterious remote and concealed by the government as an environmental disaster zone even though it is to all appearances pristine wilderness For 30 years too the secret agency known as the Southern Reach has monitored Area X and sent in expeditions to try to discover the truth Some expeditions have suffered terrible consequences Others have reported nothing out of the ordinary Now as Area X seems to be changing and perhaps expanding the next expedition will attempt to succeed where all others have failed What is happening in Area X What is the true nature of the invisible border that surrounds it **Auslöschung** Jeff VanderMeer, 2014-09-10 Seit ein mysteriöses Ereignis vor mehr als dreißig Jahren das Gebiet erschütterte ist Area X von einer unsichtbaren Grenze umgeben Niemand weiß genau was dahinter geschieht aber es gibt Gerüchte von einer sich verändernden und die Reste der menschlichen Zivilisation überwuchernden Natur einer Natur die ebenso makellos und bezaubernd wie verstörend und bedrohlich ist Zuständig für das Gebiet ist eine geheime Regierungsorganisation die sich Southern Reach nennt und den Auftrag hat herauszufinden was hinter der Grenze geschieht Aber keine der Expeditionen die Southern Reach in das Gebiet entsandte um Erklärungen für das Unerklärbare zu finden hatte bisher Erfolg Die meisten der Expeditionen endeten in Katastrophen bei denen letztlich alle Mitglieder ums Leben kamen und die Zeit um Antworten zu finden wird knapp denn Area X scheint sich immer schneller auszudehnen **Auslöschung** ist der Bericht über die zweite Expedition Sie besteht aus vier Frauen einer Anthropologin einer Landvermesserin einer Psychologin und einer Biologin Ihre Aufgabe ist es die Geheimnisse von Area X zu entschlüsseln das Gebiet zu kartographieren Flora und Fauna zu katalogisieren ihre Beobachtungen in Tagebüchern zu dokumentieren vor allem aber sich nicht von Area X kontaminieren zu lassen Doch es sind die Geheimnisse die sie mit über die Grenze gebracht haben die alles verändern werden Ein fesselnder fantastischer Roman über eine unheimliche Welt und die Fremdheit in uns Ein Roman von der Kraft eines Mythos **Transformed States** Martin Halliwell, 2024-11-15 *Transformed States* offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of

cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from Oryx and Crake to Annihilation and from Gattaca to Avatar By assessing the complex relationship between federal politics and the biomedical industry Transformed States develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books Therapeutic Revolutions 2013 and Voices of Mental Health 2017 Transformed States is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from the combat zones of World War II to the global emergency of COVID 19

Annihilation Jeff VanderMeer, 2014-02-04 Area X has been cut off from the rest of the continent for decades Nature has reclaimed the last vestiges of human civilization and the government is involved in sending secret missions to explore Area X The first expedition returned with reports of a pristine Edenic landscape all the members of the second expedition committed suicide the third expedition died in a hail of gunfire as its members turned on one another the members of the eleventh expedition returned as shadows of their former selves and within months of their return all had died of aggressive cancer Annihilation opens with the twelfth expedition The group is composed of four women including our narrator a biologist Their mission is to map the terrain and collect specimens to record all of their observations scientific and otherwise and above all to avoid succumbing to the unpredictable effects of Area X itself What they discover shocks them

first a massive topographic anomaly that does not appear on any map and second life forms beyond anything they're equipped to understand. But it's the surprises that came across the border with them that change everything: the secrets of the expedition members themselves, including our narrator. What do they really know about Area X and each other? **A History of the Literature of the U.S. South: Volume 1** Harilaos Stecopoulos, 2021-05-20. A History of the Literature of the U.S. South provides scholars with a dynamic and heterogeneous examination of southern writing from John Smith to Natasha Trethewey. Eschewing a master narrative limited to predictable authors and titles, the anthology adopts a variegated approach that emphasizes the cultural and political tensions crucial to the making of this regional literature. Certain chapters focus on major white writers, e.g. Thomas Jefferson, William Faulkner, the Agrarians, Cormac McCarthy, but a substantial portion of the work foregrounds the achievements of African American writers like Frederick Douglass, Zora Neale Hurston, and Sarah Wright to address the multiracial and transnational dimensions of this literary formation. Theoretically informed and historically aware, the volume's contributors collectively demonstrate how southern literature constitutes an aesthetic, cultural, and political field that richly repays examination from a variety of critical perspectives. **Social Practices and City Spaces** Kyriaki Tsoukala, 2023-11-07. This book examines the relationship between social practices and built space, focusing on current, cooperative, participative, and posthuman approaches to its production and management. From a social, cultural, and ecological perspective, it explores the modes of engagement of all factors in the constitutional processes of inhabited space. Throughout this interdisciplinary collection, built space is reconsidered in the light of other schools of thought such as philosophy, anthropology, social sciences, and political theories and practices. It covers new ground at conceptual, epistemic, and methodological levels, focusing on inhabited space from within the framework of globalisation, biopolitics, cultural changes, environmental crisis, and new technologies. Organised into three parts, Parts 1 and 2 focus on the role of architects in the emergence of a new ethos for habitation, as well as the modalities of the inclusion of differences in design, discussing the importance of participation and narrative at a theoretical and practical level in architecture. In the third part, the chapters delve into questions regarding the intersection of design, ecology, and technoscience in a posthuman approach, which might support the inclusion of differences in design and the emergence of a new environmental ethos. Providing a stimulating landscape of arguments and challenges to new readings of architecture, society, and the environment, this book will be of interest to researchers, students, and professionals of architecture, urban planning, anthropology, and philosophy. **Das Science Fiction Jahr 2015** Hannes Riffel, Sascha Mamczak, 2015-09-25. Using an innovative multidisciplinary approach which is deeply invested in posthumanist thought this book demonstrates how reading science fiction shapes the way we engage with lived environments In dialogue with works by widely studied science fiction authors Greg Bear N K Jemisin Paolo Bacigalupi and Jeff VanderMeer it draws out how they function as mutant narratives The first to systematically integrate three fields feminist posthumanism cognitive narratology and science fiction studies it offers a complex and coherent understanding of readerly experience as material embodied dynamic and imaginative Covering a range of urgent topics including climate fiction New Weird fiction and new phenomenologies of the body this book is the first to demonstrate how readerly experience acts as a site for ethical and political reorientation in the time of climate change **Fantasy and Myth in the Anthropocene** Marek Oziewicz, Brian Attebery, Tereza

Dedinová, 2022-02-24 The first study to look at the intersection of the discourse of the Anthropocene within the two highly influential storytelling modes of fantasy and myth this book shows the need for stories that articulate visions of a biocentric ecological civilization Fantasy and myth have long been humanity's most advanced technologies for collective dreaming Today they are helping us adopt a biocentric lens relate us with other forms of life and assist us in the transition to an ecological civilization Deliberately moving away from dystopian narratives toward anticipatory imaginations of sustainable futures this volume blends chapters by top scholars in the fields of fantasy myth and Young Adult literature with personal reflections by award winning authors and illustrators of books for young audiences including Shaun Tan Jane Yolen Katherine Applegate and Joseph Bruchac Chapters cover the works of major fantasy authors such as J R R Tolkien Terry Pratchett J K Rowling China Miéville Barbara Henderson Jeanette Winterson John Crowley Richard Powers George R R Martin and Kim Stanley Robinson They range through narratives set in the UK USA Nigeria Ghana Pacific Islands New Zealand and Australia Across the chapters fantasy and myth are framed as spaces where visions of sustainable futures can be designed with most detail and nuance Rather than merely criticizing the ecocidal status quo the book asks how mythic narratives and fantastic stories can mobilize resistance around ideas necessary for the emergence of an ecological civilization *Life, Re-Scaled* Liliane Campos, Pierre-Louis Patoine, 2022-10-11 This edited volume explores new engagements with the life sciences in contemporary fiction poetry comics and performance The gathered case studies investigate how recent creative work

reframes the human within microscopic or macroscopic scales from cellular biology to systems ecology and engages with the ethical philosophical and political issues raised by the twenty first century s shifting views of life The collection thus examines literature and performance as spaces that shape our contemporary biological imagination Comprised of thirteen chapters by an international group of academics *Life Re Scaled The Biological Imagination in Twenty First Century Literature and Performance* engages with four main areas of biological study Invisible scales cells microbes and mycelium Neuro medical imaging and diagnosis Pandemic imaginaries and Ecological scales The authors examine these concepts in emerging forms such as plant theatre climate change art ecofiction and pandemic fiction including the work of Jeff Vandermeer Jon McGregor Jeff Lemire and Extinction Rebellion s Red Rebel Brigade performances This valuable resource moves beyond the biological paradigms that were central to the nineteenth and twentieth centuries to outline the specificity of a contemporary imagination *Life Re Scaled* is crucial reading for academics scholars and authors alike as it proposes an unprecedented overview of the relationship between literature performance and the life sciences in the twenty first century

Critical Modesty in Contemporary Fiction Thom Dancer, 2021 From climate catastrophe to pandemics and economic crises the problems facing humanity are dizzyingly complex and increasingly planetary in scale *Critical Modesty in Contemporary Fiction* argues for contemporary fiction s capacity to help those who may feel despair at the enormity of such problems not as one might think through the ambitious search for grand solutions but rather by inculcating a temperament of modesty This new temperament of critical modesty locates the fight for freedom and human dignity within the limited and compromised conditions in which we find ourselves Through readings of Ian McEwan Zadie Smith J M Coetzee and David Mitchell this volume shows how contemporary works of literature model modesty as a critical temperament Exploring modest forms of entangled human agency that represent an alternative to the novel of the large scale that have been most closely associated with the Anthropocene it makes the surprising yet compelling case that precisely by adopting a modest stance the novel actually has the potential to play a more important socio cultural role In doing so the book offers an engaging response to the debate over critical and surface readings bringing novels into the conversation and arguing for a fictional mode that is both critical and modest reminding us how much we are already engaged with the world implicated and compromised before we start developing theories writing stories or acting within it
