Synthesizing Hope opens up the material and social world of pharmaceuticals by focusing on an unexpected place iThemba Pharmaceuticals Founded in 2009 with a name taken from the Zulu word for hope the small South African startup with an elite international scientific board was tasked with drug discovery for tuberculosis HIV and malaria Anne Pollock uses this company as an entry point for exploring how the location of scientific knowledge production matters not only for the raw materials manufacture licensing and distribution of pharmaceuticals but also for the making of basic scientific knowledge Consideration of this case exposes the limitations of global health frameworks that implicitly posit rich countries as the only sites of knowledge production Analysis of iThemba identifies the problems inherent in global north south divides at the same time as it highlights what is at stake in who makes knowledge and where It also provides a concrete example for consideration of the contexts and practices of postcolonial science its constraints and its promise Synthesizing Hope explores the many legacies that create conditions of possibility for South African drug discovery especially the specific form of settler colonialism characterized by apartheid and resource extraction Paying attention to the infrastructures and laboratory processes of drug discovery underscores the materiality of pharmaceuticals from the perspective of their makers and tracing the intellectual and material infrastructures of South African drug discovery contributes new insights about larger social political and economic orders      **Anthropology** Conrad P. **Anthropology**, 1974      **Looseleaf for Cultural Anthropology: Appreciating Cultural Diversity** Conrad Kottak, 2011-06-23      *Anthropology* Conrad Phillip Kottak, 2004      **The Challenge of Human Diversity** DeWight R. Middleton, 2010-04-28  
Middleton's fair uncluttered synthesis of a wide ranging topic continues to offer inspiration for thinking about what it means to be different from and similar to others. Brief ethnographic excerpts are interwoven to demonstrate the hold that culture has on us. Such firsthand experiences reported by anthropologists reveal the challenging and sometimes humorous situations that can arise when we attempt to understand others and when they do the same with us. Heralded by *Anthropology Today*, Middleton by making the sensory and intellectual challenge of culture shock so central to his pedagogic strategy has found common ground that should unite all schools of cultural anthropology. The work brims with valuable insights that broaden possibilities to achieve rewarding human interaction whether in our own neighborhood or across the globe. Arguably one of the best contemporary treatments of cultural diversity available, the latest edition includes expanded discussions of applied anthropology and ethics.      **Explaining Human Diversity** Carles Salazar, 2018-07-04  
Why are humans so different from each other and what makes the human species so different from all other living organisms? This introductory book provides a concise and accessible account of human diversity, of its causes and the ways in which anthropologists go about trying to make sense of it. Carles Salazar offers students a thoroughly integrated view by bringing together biological and sociocultural anthropology and including perspectives from evolutionary biology and psychology.      **Looseleaf for Mirror for Humanity** Conrad Phillip Kottak, 2017-09-12  
Written by a prominent scholar in the field, Conrad Phillip Kottak, this concise student friendly current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. New to this edition, *Connect Anthropology* offers a variety of learning tools and activities to make learning more engaging for students and teaching more efficient for instructors. *Mirror for Humanity* is a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text.      **Dynamics of Human Biocultural Diversity** Elisa J. Sobo, 2016-06-16  
This lively text by leading medical anthropologist Elisa J. Sobo offers a unique holistic approach to human diversity and rises to the challenge of truly integrating biology and culture. The inviting writing style and fascinating examples make important ideas from complexity theory and epigenetics accessible to students. In this second edition, the material has been updated to reflect changes in both the scientific and socio-cultural landscape, for example in relation to topics such as the microbiome and transgender. Readers learn to conceptualize human biology and culture concurrently as an adaptive biocultural capacity that has helped to produce the rich range of human diversity seen today. With clearly structured topics, an extensive glossary, and suggestions for further reading, this text makes a complex interdisciplinary topic a joy to teach.      *Understanding Human Diversity* Jonathan Marks, 2024-08-31

our DNA say about race gender equality or ancestry Drawing on the latest discoveries in anthropology and human genetics Understanding Human Diversity looks at scientific realities and pseudoscientific myths about the patterns of diversity in our species challenging common misconceptions about genetics race and evolution and their role in shaping human life today By examining nine counterexamples drawn from popular scientific ideas that is to say examinations of what we are not this book leads the reader to an appreciation of what we are We are hybrids with often inseparable natural and cultural aspects formed of natural and cultural histories and evolved from remote ape and recent human ancestors This book is a must for anyone curious about human genetics human evolution and human diversity     The Challenge of Human Diversity DeWight R.
