Biopharmaceuticals, an Industrial Perspective G. Walsh, B. Murphy, 2013-03-09 Biopharmaceuticals an Industrial Perspective provides a unique and up to date insight into the biopharmaceutical industry Largely written by industrial authors its scope is multidisciplinary Several chapters overview the production and medical applications of specific biopharmaceuticals Other chapters detail additional relevant issues including the stabilisation of biopharmaceutical products EU biopharmaceutical regulatory affairs and biopharmaceutical patent law A series of four chapters reviews important validation issues as applied to biopharmaceutical manufacturing Additional issues considered include biopharmaceutical information technology as well as viral and non viral gene therapy The book is of particular relevance to scientists and allied professionals already employed in the biopharmaceutical industry or to those seeking employment within this industry Its scope also renders it an ideal reference source for students undertaking advanced undergraduate or postgraduate courses in biotechnology pharmaceutical science biochemistry or medicine Current Cardiovascular Drugs William H.

Frishman, Angela Cheng-Lai, Julie Chen, 2013-06-29 The third edition of Current Cardiovascular Drugs is designed to provide an updated practical compendium of current knowledge regarding cardiovascular drug therapy in a concise easily readable format The book is organized into chapters by drug class and details the pharmacologic characteristics of specific treatment entities The clinical efficacy and limitations of the various drug therapies are discussed using supportive reference material from the most authoritative sources and published clinical trials Vascular Diseases for the Non-Specialist Tulio Pinho

Navarro, Alan Dardik, Daniela Junqueira, Ligia Cisneros, 2017-01-03 This book aims to provide non specialist healthcare practitioners with current focused and objective information on the most common vascular diseases encountered in daily clinical practice In day to day clinical practice many healthcare practitioners do not have a working knowledge of the most common vascular diseases that frequently arise in patient care Some of these topics include aneurysms peripheral arterial disease diabetic foot venous thromboembolism cerebrovascular disease aortic dissection and acute limb ischemia These commonly encountered vascular diseases are becoming public health issues due to their high morbidity and mortality as well as increasing healthcare costs Since patients with vascular diseases are often referred to non specialists the general practitioner must know how to properly handle the most common vascular diseases encountered in daily clinical practice For each disease the concept epidemiology natural history diagnosis and treatment are described followed by essential advice on what the non specialist can do for the patient and when to refer the patient to a specialist Dyslipidemia Samy I.

McFarlane, 2019-12-18 Dyslipidemia is a major risk factor for cardiovascular disease which is the leading cause of morbidity and mortality around the globe particularly among aging populations Lipoprotein disorders frequently encountered by clinicians require early recognition and treatment In this book we assembled a group of world renowned scholars in their

field to address major areas in lipoprotein disorders that are imminently relevant to clinicians and other healthcare providers Areas discussed include an overview of lipid metabolism a complex topic presented in a simplified and rational way We also highlight recent developments in the field including dyslipidemias characterized by nontraditional lipid biomarkers Furthermore we discuss the pathogenesis of atherosclerosis and the role of dyslipidemia Other chapters include the assessment of primary and secondary causes of dyslipidemia Targets for treatment as well as the role of major therapeutic agents including statins and PCSK9 inhibitors are also discussed in light of the most recent guidelines by major international organizations This is in addition to an overview of lifestyle and dietary modification as well as alternative options for dyslipidemia management Furthermore dyslipidemia in special populations is emphasized including various ethnic groups as well as those with HIV disease chronic kidney disease among others The role of adiposity including brown fat together with highlights on lipidomics and dyslipidemias characterized by nontraditional lipid biomarkers is also highlighted We believe that this volume will serve as a valuable resource not only for clinicians and other healthcare providers but for students and research scholars as well

Antithrombotic Drugs in Thrombosis Models Josef Hladovec, 2020-11-25 Antithrombotic Drugs in Thrombosis Models presents a critical review of the use of thrombosis models and an original highly sensitive methodology for testing antithrombotics based on a more adequate understanding of thrombotic processes The methods form an integrated system stressing particularly the plurifactorial and global character of thrombosis and the key role of a generalized mild endothelial lesion Packed with illustrations this book documents the effectiveness of the system through the screening of a series of acknowledged and potential antithrombotics and includes a unique study of their mutual combinations Special emphasis is placed on the importance of biomodels for preliminary testing of antithrombotics This book is particularly useful to researchers in pharmacology and the pharmaceutical industry however those interested in drug research and the field of cardiovascular medicine will benefit as well
