Prime Time Soap Operas on Indian Television Shoma Munshi, 2020-02-18 This book examines the phenomenon of prime time soap operas on Indian television An anthropological insight into social issues and practices of contemporary India through the television this volume analyzes the production of

soaps within India's cultural fabric. It deconstructs themes and issues surrounding the everyday and the middle class through the fiction of the popular. In its second edition, this still remains the only book to examine prime time soap operas on Indian television. Without in any way changing the central arguments of the first edition, it adds an essential introductory chapter tracking the tectonic shifts in the Indian mediascape over the past decade, including how the explosion of regional language channels and an era of multiple screens have changed soap viewing forever. Meticulously researched and persuasively argued, the book traces how prime time soaps in India still grab the maximum eyeballs and remain the biggest earners for TV channels. The book will be of interest to students of anthropology and sociology, media and cultural studies, visual culture studies, gender and family studies, and also Asian studies in general. It is also an important resource for media producers both in content production and television channels, as well as for the general reader.

World Literature and Postcolonial Studies, 2023-04-17 What is the role of literature in our global landscape today? How do local authors respond to the growing worldwide power of English and the persisting effects of the colonial systems that paved the way for globalization today? These questions have often been approached very differently by postcolonialists and by students of world literature, but over the past two decades a developing dialogue between these divergent approaches has produced robust scholarship and sometimes fractious debate, as issues of language politics and cultural difference have come to the fore. Drawing on a wide variety of cases from medieval Wales to contemporary Syria and Australia, and on works written in Arabic, Basque, English, Hindi, and more, this collection explores the mutual illumination that can be gained through the interaction of postcolonial and world literary perspectives.

Literary Cultures and Twenty-First-Century Childhoods Nathalie op de Beeck, 2020-08-05 In the early decades of the twenty-first century, we are grappling with the legacies of past centuries and their cascading effects upon children and all people. We realize anew how imperialism, globalization, industrialization, and revolution continue to reshape our world and that of new generations. At a volatile moment, this collection asks how twenty-first-century literature and related media represent and shape the contemporary child, childhood, and youth. Because literary representations construct ideal childhoods as well as model the rights, privileges, and respect afforded to actual young people, this collection surveys examples from popular culture and from scholarly practice. Chapters investigate the human rights of children in literature and international policy, the potential subjective agency and power of the child, the role models proposed for young people, the diverse identities children embody and encounter, and the environmental well-being of future human and nonhuman generations. As a snapshot of our developing historical moment, this collection identifies emergent trends, considers theories and critiques of childhood and literature, and observes how new technologies and paradigms are destabilizing past conventions of storytelling and lived experience.
