**Inside the Arab State** Mehran Kamrava, 2018-08-15 The 2011 Arab uprisings and their subsequent aftermath have thrown into question some of our long held assumptions about the foundational aspects of the Arab state While the regional and international consequences of the uprisings continue to unfold with great unpredictability their ramifications for the internal lives of the states in which they unfolded are just as dramatic and consequential States historically viewed as models of strength and stability have been shaken to their foundations Borders thought impenetrable have collapsed sovereignty and territoriality have been in flux This book examines some of the central questions facing observers and scholars of the Middle East concerning the nature of power and politics before and after 2011 in the Arab world The focus of the book revolves around the very nature of politics and the exercise of power in the Arab world conceptions of the state its functions and institutions its sources of legitimacy and basic notions underlying it such as sovereignty and nationalism Inside the Arab State adopts a multi disciplinary approach examining a broad range of political economic and social variables It begins with an examination of politics and more specifically political institutions in the Arab world from the 1950s on tracing the travail of states and the wounds they inflicted on society and on themselves along the way until the eruption of the 2011 uprisings The uprisings the states responses to them and efforts by political leaders to carve out for themselves means of legitimacy are also discussed as are the reasons for the emergence and rise of Daesh and the Islamic State Power I argue and increasingly narrow conceptions of it in terms of submission and conformity remains at the heart of Arab politics popular protests and yearnings for change notwithstanding Much has changed in the Arab world over the last several decades But even more has stayed the same

**The Report: Dubai 2018** , Dubai has continued to meet its targets in becoming the global capital of Islamic finance nearly doubling the number of sukuk Islamic bonds listings on its exchanges since 2017 Furthermore eased policy restrictions to encourage foreign investment and the 2019 budget s continued commitment to infrastructure development ahead of Expo 2020 are expected to continue driving economic activity As one of the most diversified economies in the region Dubai continues to present growth opportunities in various sectors including tourism logistics manufacturing and education Although the emirate has benefitted from its proximity to oil and gas fields Dubai is right at the forefront of the emerging cleaner energy world and developing and promoting renewable technologies including solar energy and electric vehicles

**The Report: Qatar 2016** Oxford Business Group, 2016-01-25 Qatar s sizeable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades Home to the world s largest non associated gas field the country is the world s fourth largest producer of dry natural gas and the largest producer of liquefied natural gas with hydrocarbons revenues forming the bulk of national income as a result Although the drop in global energy prices has impacted export revenues rigorous economic diversification drives in recent years have paid dividends and in 2015 non hydrocarbons growth reached 7.7% compared to a 0.1% contraction for hydrocarbons growth during the same period The country s financial sector has continued to evolve Islamic banking in particular has witnessed significant progress Meanwhile

**The Report: Abu Dhabi 2019** Oliver Cornock, Abu Dhabi is the largest of the seven emirates that comprise the UAE in terms of both its land mass and economy and home to the majority of the country s energy

production and reserves While the emirate is home to the world's sixth largest proven oil reserves financial buffers have helped it diversify and yield steady non oil revenues *The Report: Oman 2017*, Oman's economy contracted by 13.8% in nominal terms in 2015 as the ongoing low oil price environment squeezed growth and led to the largest budget deficit in over a decade In a bid to tackle the shortfall the government is taking a number of revenue raising measures such as cutting subsidies and increasing corporation tax while remaining focused on its long term diversification goals Though hydrocarbons still account for 33.9% of GDP and 78.7% of state revenues non oil sectors are playing an increasingly prominent role in the country's economic profile Authorities are targeting heavy industries in particular with plans to boost their GDP contribution to from 19.8% today to 29% by 2020 Meanwhile annual growth of 6% is being targeted in the mining sector with a host of regulatory initiatives being implemented as the government seeks to boost investor interest **The Report: Saudi Arabia 2015** Oxford Business Group, 2015-09-22 While Saudi Arabia's economy remains dominated by its hydrocarbons sector several other sectors have emerged in recent years as key propellers of economic growth The Kingdom's financial services industries have continued to expand steadily despite the liquidity challenges posed by falling oil prices Trade and investment are being treated as key priorities as the government looks to negotiate this altered economic landscape aiming to leverage its large population high per capita income and many sea and air links The country's capital markets sector meanwhile is poised for a period of significant growth on the back of the opening of Tadawul to international investors in 2015 and the raft of regulatory upgrades implemented as result The domestic insurance industry which remains dominated by the motor and medical segments has enjoyed double digit growth over the past five years in both revenue and net profit Elsewhere the targets outlined in Vision 2030 indicate that a period of greater opportunity and integration is on the horizon for private players operating in core sectors such as health care utilities industry and ICT **The Report: Abu Dhabi 2016** Oxford Business Group, 2016-05-09 Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE like other countries in the region tightened its belt in response to falling hydrocarbons revenues However a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non oil sectors in recent years means the emirate is well positioned to weather the storm Looking forward plans for future development are mapped out in Abu Dhabi Economic Vision 2030 a comprehensive economic policy document that aims to reduce dependence on oil and gas thereby creating a more sustainable knowledge based economy for the emirate and its inhabitants Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors including oil and gas financial services health care aviation and renewable energy **The Report: Bahrain 2017** Oxford Business Group, Like its Gulf neighbours Bahrain has continued to offset the effects of the drop in oil prices with a host of measures including moves towards subsidy reduction now in place to ease the pressure Despite the downturn however the country has continued to

push ahead with many big ticket projects Counter cyclical spending in the energy sector is expected to stand the broader economy in good stead in the years to come as expansion boosts the country's refining capacity and provides a reliable supply of fuel for its heavy industries Indeed manufacturing continues to play a significant role with the 3bn project to build a sixth potline for Aluminium Bahrain representing the company's largest expansion since potline five came on stream in 2005 The kingdom's financial sector has long been a dominant player in the region and despite increasing competition from emerging financial centres in the region continues to benefit from an advanced regulatory framework an educated workforce and a relatively low cost environment

**The Report: Dubai 2020** Oliver Cornock, Although Dubai has traversed some challenging economic territory over recent years the economic stimulus of Expo 2020 preparation and more stable oil prices have eased this strain in 2019 and business sentiment has improved accordingly With the long anticipated expo event set to take place in 2020 attention has started to focus on the important question of sustaining the current economic momentum over the medium term

**The Report: Dubai 2019** Oliver Cornock, Near term sentiment is on the rise amongst Dubai's business leaders with the IMF forecasting a healthy GDP growth rate of 4.2% in 2019 for the emirate While not as exposed as some of its regional neighbours to the effects of fluctuating commodities prices in recent times Dubai nevertheless stands to benefit from the knock on effects of higher prices over the last year

**The Report: Oman 2016** Oxford Business Group, 2016-01-12 Oman's GDP grew 4.6% between 2013 and 2014 according to the Oman Central Bank with hydrocarbons the main driver of the economy at almost 50% of GDP Although the dip in oil prices has put pressure on government revenues authorities are pressing ahead with spending plans for the sector particularly in the downstream segment The country's infrastructure expansion plans are also moving forward particularly at the country's three ports as the country seeks to leverage its strategic position on the Strait of Hormuz and establish itself as a global transport and logistics hub Feeding off this development drive are the sultanate's banks with project finance regarded as one of the most promising areas for lending growth In the longer term Oman Vision 2020 seeks to boost private sector participation in the economy and fuel SME growth in key sectors including construction retail tourism and transport

**Doing Business in the Middle East** Pawan Budhwar, Vijay Pereira, 2023-05-04 The Middle East has for a long time been at the centre of global trade as well as political interest Demographic and social change shifts in global economic power rapid urbanisation climate change and resource scarcity and significant technological development make this region both complex and hugely important Doing Business in the Middle East highlights both the opportunities and constraints confronting foreign investors in the region and proposes strategies on how best to overcome them The book explores the existing and emerging political and legal frameworks sociocultural patterns national infrastructures regulatory environment conflict resolution and how to negotiate in the Middle East It also provides useful insights into how to approach advertising and marketing promotion and distribution and also at the strategies for investing in the region and appropriate modes of entry With a number of features such as case

studies examples of effective and ineffective practices clear takeaways and a note on a future agenda on each given topic this book is highly practical Based on robust research this comprehensive guide to doing business in the Middle East is an ideal reference tool for potential foreign investors those who are already doing business or intend to do so in the region and for a range of business and policy decision makers The book is also suitable for students and researchers in the fields of international management and business international and strategic HRM cross cultural management and business communication

*The Report: Oman 2018* Oliver Cornock, The effects of lower oil prices continue to be felt in Oman with budget cuts and spending rationalisation still in evidence across the board However higher commodity prices in late 2017 and into early 2018 should provide a welcome boost to state revenues

**The Report: Qatar 2015** Oxford Business Group, 2015-04-22 Qatar's sizable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades Home to the world's largest non associated gas field the country is the world's fourth largest producer of dry natural gas and the largest producer of liquefied natural gas with hydrocarbons revenues forming the bulk of national income as a result Although the drop in global energy prices has impacted export revenues rigorous economic diversification drives in recent years have paid dividends and in 2015 non hydrocarbons growth reached 7.7% compared to a 0.1% contraction for hydrocarbons growth during the same period The country's financial sector has continued to evolve Islamic banking in particular has witnessed significant progress Meanwhile as the country gears up to host several important sporting events in the coming years most notably the 2022 FIFA World Cup numerous big ticket infrastructure builds continue to expand the construction sector
