Jameson Organic Design in Twentieth-Century Nordic Architecture Erik Champion, 2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz Jørn Utzon Sverre Fehn and the Aaltos Aino Elissa and Alvar among others It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer architectural brief and building as process With over 140 black and white images this book is an intriguing read for architecture students and professionals alike The Domestic and the Foreign in Architecture Ruth Baumeister, Sang Lee, 2007 For centuries across nations dialogue between the domestic and the foreign has affected and transformed architecture Today these dialogues have become highly intensified The Domestic and the Foreign in Architecture examines how these exchanges manifest themselves in contemporary architecture in terms of its aesthetic potential and its practice which in turn are impacted by broad economic cultural and political issues This book traces how diverse cultural encounters inevitably modify conventional categories standards and codes of architecture such as domestic identity its political and economic representations and the negotiations with what is deemed foreign Theoretical reflections by distinguished scholars are accompanied by interviews with some of the most influential architects practicing today as well as stunning visual presentations by professional photographers **Call for Action** Gabriela D Grawe, 2002-01-01 Das Buch behandelt Leben und Werk der Bauhausler die nach 1937 in die USA auswanderten Das nordamerikanische Wirken der Bauhausmitglieder wird sowohl hinsichtlich ihrer jeweiligen persönlichen Entwicklung untersucht als auch im Hinblick auf die Rezeption durch die Kultur des Gastlandes Erstmals aus der Spiegelsicht der beiden komplementären Schauplätze USA und Deutschland werden reale Fakten der historischen Bauhaus Rezeption nach Quellen interpretiert und vor allem mit der begleitenden theoretischen Diskussion kombiniert Dies macht eine grundsätzliche Besonderheit des Buches aus das damit weit über alle bisherigen Darstellungen hinausgeht welche stets entweder aus amerikanischem oder aber aus deutschem Blickwinkel argumentieren Der Haupttext umfasst neu erschlossene Quellen zumeist Briefe führender Bauhauspersönlichkeiten aus amerikanischen und deutschen Archiven Ergänzend ist ein biographisches Verzeichnis der Bauhausmitglieder in Nordamerika beigefügt Die Auswahlbibliographie zum Thema Bauhaus und Amerika bereitet eine Vielfalt einschlägiger amerikanischer Literatur auf **Expressionism Reassessed** Shulamith Behr, David Fanning, Douglas Jarman, 1993 Expressionism reassessed focuses on the multi disciplinary development of Expressionism setting it in a cultural political and historical context The international team of specialists cover painting music theatre sculpture film opera architecture and dance Back cover **An Architecture of Immanence** Mark A. Torgerson, 2007-01-22 Torgerson begins by discussing God's transcendence and immanence and showing how church

architecture has traditionally interpreted these key concepts He then traces the theological roots of immanence s priority from liberal theology and liturgical innovation to modern architecture Next Torgerson illustrates this new architecture of immanence through particular practitioners focusing especially on the work of theologically savvy architect Edward Anders S vik Finally he addresses the future of church architecture as congregations are buffeted by the twin forces of liturgical change and postmodernism

Designing for Democracy Jennifer Forestal,2022 How should we fix digital technologies to support democracy instead of undermining it In Designing for Democracy Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory Designing for Democracy provides blueprints for democracy in a digital age

**Spatial Theories for the Americas** Fernando Luiz

Lara,2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of Spatial Theories for the Americas offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the

insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses Spatial Theories for the Americas proposes a fundamental step in that direction
