### **Abstract**

Globalisation has changed the way most people live, work and study in the 21st century. Teachers and teacher educators, like other professionals, must embrace these changes to be effective in their jobs and one ongoing change is the use of Information Communication Technologies (ICTs) for lifelong learning. In this paper we describe how one group of academics in a university programme preparing new teachers has embraced change to introduce innovative programmes using ICTs and heutagogy rather than pedagogy. Heutagogy prepares students for the self-determined lifelong learning which is essential for survival in a 21st century world.

### **Introduction**

In a complex and rapidly changing globalised world it is critically important that teachers and teacher educators engage in debate, decision making, new knowledge creation and action for change. In this paper we discuss how the need for change has been embraced to inform and reframe practice. We showcase some elements of teacher education at the University of Western Sydney (UWS) in New South Wales, Australia. A heutagogical rather than a pedagogical model for knowledge creating has been chosen as the core teaching methodology around which our programmes have been reframed. In outlining the rationale for our changed approaches we briefly discuss some factors influencing knowledge sharing in communities of practice. We comment on the research that led to an exploration and adoption of heutagogy, or self-determined learning, which we feel better facilitates desirable graduate teacher outcomes and prepares educators ready to take their place in the 21st century globalised knowledge economy.

**Back to the Future** Maria Assunção Flores, Ana Amélia Carvalho, Fernando Ilídio Ferreira, Maria Teresa Vilaça, 2013-06-13. Schools and teachers are facing various challenges in a rapidly changing world. In such circumstances, discussing and sharing concerns of mutual interest regarding policy, practice, and research is crucial to creating more sophisticated understandings of the various challenges as a first step in the improvement of education. While the future should not be imprisoned in the past, the past does provide valuable lessons that will undergo new iterations in constructing the future. The future will be multifaceted and complex, and the different chapters included in this book are intended to provide important contributions from which to build the future of education. The different chapters provide readers with international perspectives, frameworks, and empirical evidence of legacies, continuities, and changes in educational policy, practice, and research in teaching, teacher education, and learning. We hope that they inspire the readers to build the future and to change their own professional realities.

Cheryl J. Craig, Ph.D., Professor, University of Houston, Houston, TX, USA. Secretary, ISATT. This book metaphorically captures the looking backward to the past, pressing forward to the future that typically takes place on celebratory occasions. It causes us to pause and remember even as we race toward a time unknown to us. In a sense, the authors featured in this book serve as tour guides pointing out legacies, continuities, and changes in teaching and teacher education. I strongly urge readers not only to peruse the chapters that follow but to distill them to their essences and to glean what is of value to be learned from them. In conclusion, the ISATT Executive especially thanks the co-editors of this volume who have compiled a superb collection of chapters on a timely and relevant topic.
