**An Introduction to Biological Evolution** Kenneth V. Kardong, 2005 Written for a general college audience this book offers an introduction to the principles and significance of Darwinian evolution It differs from most other textbooks on evolution in three fundamental ways first it is intended for students taking evolution early in their studies second it examines the intellectual significance of Darwinian evolution and third the text departs from the standard treatment of evolution in other textbooks wherein the arguments are reductionist molecular and overwhelmingly genetic in emphasis Ken Kardong also author of *Vertebrates Comparative Anatomy Function Evolution* is known for his accessible writing style His almost conversational approach to this topic puts the reader at ease while learning evolutionary concepts The result is an inviting book that will be read
