Architecture of the Bight of Biafra Joseph Godlewski,2024-03-06 The Architecture of the Bight of Biafra challenges linear assumptions about agency progress and domination in colonial and postcolonial cities adding an important sub Saharan case study to existing scholarship on globalization and modernity Intersected by small creeks rivulets and dotted with mangrove swamps the Bight of Biafra has a long history of decentralized political arrangements and intricate trading networks predating the emergence of the Atlantic world While indigenous merchants in the region were active participants in the transatlantic slave trading system they creatively resisted European settlement and maintained indigenous sovereignty until the middle of the nineteenth century Since few built artifacts still exist this study draws from a close reading of written sources travelers accounts slave traders diaries missionary memoirs colonial records and oral histories as well as contemporary fieldwork to trace transformations in the region s built environment from the sixteenth century to today With each chapter focusing on a particular spatial paradigm in this dynamic process this book uncovers the manifold and inventive ways in which actors strategically adapted the built environment to adjust to changing cultural and economic circumstances In parallel it highlights the ways that these spaces were rhetorically constructed and exploited by foreign observers and local agents Enmeshed in the history of slavery colonialism and the modern construction of race the spatial dynamics of the Biafran region have not been geographically delimited The central thesis of this volume is that these spaces of entanglement have been productive sites of Black identity formation involving competing and overlapping interests occupying multiple positions and temporalities and ensnaring real imagined and sometimes contradictory aims This book will be of interest to researchers and students of architecture architectural history urban geography African studies and Atlantic studies *The Benin Plaques* Kathryn Wysocki Gunsch,2017-12-15 The 16th century bronze plaques from the kingdom of Benin are among the most recognized masterpieces of African art and yet many details of their commission and installation in the palace in Benin City Nigeria are little understood The Benin Plaques A 16th Century Imperial Monument is a detailed analysis of a corpus of nearly 850 bronze plaques that were installed in the court of the Benin kingdom at the moment of its greatest political power and geographic reach By examining European accounts Benin oral histories and the physical evidence of the extant plaques Gunsch is the first to propose an installation pattern for the series **Routledge Handbook of Islam in**

Africa Terje Østebø, 2021-12-20 Bringing together cutting edge research from a range of disciplines this handbook argues that despite often being overlooked or treated as marginal the study of Islam from an African context is integral to the broader Muslim world Challenging the portrayal of African Muslims as passive recipients of religious impetuses arriving from the outside this book shows how the continent has been a site for the development of rich Islamic scholarship and religious discourses Over the course of the book the contributors reflect on The history and infrastructure of Islam in Africa Politics and Islamic reform Gender youth and everyday life for African Muslims New technologies media and popular culture Written by leading scholars in the field the contributions examine the connections between Islam and broader sociopolitical developments across the continent demonstrating the important role of religion in the everyday lives of Africans This book is an important and timely contribution to a subject that is often diffusely studied and will be of interest to researchers across religious studies African studies politics and sociology

Consuming Tradition, Manufacturing Heritage Nezar AlSayyad, 2001 This book reintroduces the idea of the city as a territorial concept The use of the built environment as a lens will place globalization debates in the specific context of national regional and local expression

The Making of Museums in Nigeria Amanda H. Hellman, 2023-10-16 In November 1927 Kenneth Crosthwaite Murray 1902 1972 left his family home in West Sussex England to develop the art program in the British colony of Nigeria As he traveled the country Murray saw the cultural practices and craft production of Nigerian visual material under threat and decided to collect these pieces in order to preserve understand and perhaps console during a period of great change Murray and a few of his colleagues including Edward H Duckworth Bernard E B Fagg and Ekpo Eyo and the antiquities department that they founded built seven museums before independence established export policies began calling for the return of cultural heritage and developed excavation protocol This book captures the life and legacy of Murray whose efforts helped foster an understanding of Nigerian art and culture and explores the tension that arose among the colonial government officers and Nigerians who sought to build these cultural institutions during the twilight years of the British Empire and the transition to a newly independent Nigeria

Architecture in Global Socialism Łukasz Stanek, 2020-01-14 How socialist architects planners and contractors worked collectively to urbanize and develop the Global South during the Soviet era In the course of the Cold War architects planners and construction companies from socialist Eastern Europe engaged in a vibrant collaboration with those in West Africa and the Middle East in order to bring modernization to the developing world Architecture in Global Socialism shows how their collaboration reshaped five cities in the Global South Accra Lagos Baghdad Abu Dhabi and Kuwait City Łukasz Stanek describes how local authorities and professionals in these cities drew on Soviet prefabrication systems Hungarian and Polish planning methods Yugoslav and Bulgarian construction materials Romanian and East German standard designs and manual laborers from across Eastern Europe He explores how the socialist development path was adapted to tropical conditions in Ghana in the 1960s and how Eastern European architectural traditions were given new life in 1970s

Nigeria He looks at how the differences between socialist foreign trade and the emerging global construction market were exploited in the Middle East in the closing decades of the Cold War Stanek demonstrates how these and other practices of global cooperation by socialist countries what he calls socialist worldmaking left their enduring mark on urban landscapes in the postcolonial world Featuring an extensive collection of previously unpublished images *Architecture in Global Socialism* draws on original archival research on four continents and a wealth of in depth interviews This incisive book presents a new understanding of global urbanization and its architecture through the lens of socialist internationalism challenging long held notions about modernization and development in the Global South **Diversity in Design** Vibhavari Jani,2011-06-23 This text provides lecturers with a resource to teach interior design from an inclusive perspective acknowledging the contributions of all world cultures rather than just western European traditions *Between Solidarity and Economic Constraints* Christoph Bernhardt,Andreas Butter,Monika Motylinska,2023-04-27 Until the end of the Cold War in 1990 building projects and architectural icons played an important role in the self portrayal of the competing systems However as the current research shows we also find a large variety of forms of cooperation between the East the South and the West not to forget the manifold cross border entanglements within the South or the East This book explores the intersection of two strands of research On the one hand interaction in the field of architecture and construction between actors from socialist countries and from countries of the Global South have increasingly won interest amongst historians of architecture and planning On the other hand in the context of the strongly emerging Cold War Studies scholars have explored cooperation and circulation across the Iron Curtain with a focus on economic and research planning This book connects perspectives of planning construction and architectural design with those on economic interests and conflicts in projects and networks Furthermore it opens the view to the hubs of communication and exchange and on patterns of longterm transformation and appropriation of architecture *The Arts of Africa* ,1995 *Sacred Precincts* Mohammad Gharipour,2014-11-10 This book examines non Muslim religious sites structures and spaces in the Islamic world It reveals a vibrant portrait of life in the religious sites by illustrating how architecture responds to contextual issues and traditions *Sacred Precincts* explores urban context issues of identity design construction transformation and the history of sacred sites and architecture in Europe the Middle East and Africa from the advent of Islam to the 20th century It includes case studies on churches and synagogues in Iran Turkey Cyprus Egypt Iraq Tunisia Morocco and Malta and on sacred sites in Nigeria Mali and the Gambia With contributions by Clara Alvarez Angela Andersen Karen Britt Karla Britton Jorge Manuel Sim o Alves Correia Elvan Cobb Daniel Coslett Mohammad Gharipour Mattia Guidetti Suna G ven Esther K hn Amy Landau Ayla Lepine Theo Maarten van Lint David Mallia Erin Maglaque Susan Miller A A Muhammad Oumar Meltem zkan Alt n z Jennifer Pruitt Rafael Sedighpour Ann Shafer Jorge Manuel Sim o Alves Correia Ebru zeke T kmeci Steven Thomson Heghnar Watenpaugh Alyson Wharton and Ethel S Wolper **The Arts of Africa: 1992 (With Omissions from 1986 through 1991)** ,1997 Catalog of the
