Bion in Film Theory and Analysis Carla Ambrósio Garcia, 2016-12-01 In *Bion in Film Theory and Analysis* The Retreat in Film Carla Ambrósio Garcia introduces the rich potential of the thinking of British psychoanalyst Wilfred Bion for film theory By so doing she rethinks the space of the cinema as a space of retreat and brings new insights into the representation of retreat in film Presented in two parts the book seeks to deepen our understanding of the film experience and psychical growth Part I places Bion's view on the importance of the epistemophilic instinct at the heart of a critique of the pleasure centred theories of the cinematic apparatus of Jean Louis Baudry Christian Metz and Gaylyn Studlar proposing an idea of cinema as thoughts in search of a thinker Garcia then moves from Bion's epistemological period to his later work which draws on mysticism in order to posit an emotional experience in the cinema through which the subject can be or become real or at one with O Part II examines representations of retreat in four European films directed by Ingmar Bergman Pier Paolo Pasolini Georges Perec and Bernard Queysanne and Manoel de Oliveira showing them to articulate a gesture of retreat as an emotionally turbulent transitional stage in the development of the psyche what Bion conceptualizes as caesura Through its investigation of the retreat in cinema the book challenges common understandings of retreat as a regressive movement by presenting it as a gesture and space that can also be future oriented

Bion in Film Theory and Analysis will be of significant interest to academics and students of psychoanalysis psychotherapy and film and media studies as well as psychoanalysts and psychotherapists

Wehrle,2001-02-28 In this radical reinterpretation of Aristotle s Metaphysics Walter E Wehrle demonstrates that developmental theories of Aristotle are based on a faulty assumption that the fifth chapter of Categories substance is an early theory of metaphysics that Aristotle later abandoned The ancient commentators unanimously held that the Categories was semantical and not metaphysical and so there was no conflict between it and the Metaphysics proper They were right Wehrle argues the modern assumption to the contrary is based on a medieval mistake and is perpetuated by the anti metaphysical postures of contemporary philosophy Furthermore by using the logico semantical distinction in Aristotle s works Wehrle shows just how the principal contradictions in Metaphysics Books VII and VIII can be resolved The result in an interpretation of Aristotle that challenges mainstream viewpoints revealing a supreme philosopher in sharp contrast to the developmentalists version

Augustine's Confessions Robert Hunter Craig, 2020-10-29 Augustine s Confessions Conversion and Consciousness argues two original positions concerning the structure and meaning of the Confessions by Augustine The structure is found to be a tool used by Augustine in his earlier pre Confessions writings in which he uses the Allegory of the Cave in book VII of the Republic by Plato to both describe human consciousness and as a structural framework for his own life story As with Plato s allegory Augustine then uses Books X XIII to do what the author calls Scriptural Philosophical analysis of the allegorical prayer previously given The author shows that the Confessions is really an allegorical quasi prayer that shows Augustine s state of mind or disposition through space time and at the same time uses different personas schools of thought and metaphysical constructs to show the inadequacy of Plato s consciousness model of the cave to truly describe human ratiocination within consciousness in its totality Synchronic Synthetic Triplex SST or body mind God Will substance Instead Augustine demonstrates the superiority of the Christian conversion to that of the Platonic as described both by Platonic books and the books of the Platonists The Christian conversion is based on the incarnate Wisdom of Christ Jesus

Psychoanalysis of Aging and Maturity Guillermo Julio Montero, 2020-10-12 As developing countries increasingly confront the issues of an aging population this important book identifies the key period in the life cycle in which changes to the body as well as concomitant psychological developments result in the entering of a new phase of life maturation The author defines the metapsychology of maturation from a psychoanalytic standpoint detaching it from the concepts of midlife and middle age Supported by clinical examples the book defines the stimuli which are the precursors to this phase before examining the complete set of psychological challenges it entails The author also highlights how maturation has been illustrated in key literary figures in the 20th century and draws parallels with the mythical cycle of the hero This fascinating and original book will be essential reading for psychoanalysts psychotherapists and any professional working with issues around aging *The Origins of Liberty: An Essay in Platonic Ontology* Alexander Zistakis, 2018-05-15 Unlike the vast majority of existing literature on Plato this book seeks to argue that liberty constitutes the central notion and preoccupation of Platonic thought and that his theory of ideas is indeed a theory of liberty Moreover this book contends that Plato's thought can be understood to be both one of liberty and a theory of liberation Bound up in its efforts to reveal both the ideal liberty and the conditions and possibility of its existence in the so called real world the thought of liberty tends to be all encompassing Consequently this book seeks to expose how liberty can be understood to influence Plato's ontological form of analysis in relation to politics philosophy and anthropology as well as its influence on the structural unity of all three Understood from such a perspective this book frames Platonic philosophy as primarily an investigation an articulation and as a way of establishing the relationship between the individual and the collective Importantly this relationship is acknowledged

to be the natural and original framework for any conception and exercise of human liberty especially within democratic theory and politics By treating Plato's philosophy as a continuous effort to find modes and dimensions of liberation in and through different forms of this relationship this book hopes to not only engage in the discussion about the meaning of Platonic ontological political insights on different grounds but also to provide a different perspective for the evaluation of its relevance to the main contemporary issues and problems regarding liberty liberation democracy and politics This book will be of interest to both undergraduate students experienced scholars and researchers as well as to the general public who have an interest in philosophy classics and political theory Necessity and Philosophy in Plato's Republic Russell

Winslow,2024-08-06 Necessity and Philosophy in Plato's Republic offers an interpretation of the concept of necessity in what is perhaps Plato's most read dialogue The word necessity *anagk* appears hundreds of times in the text in many grammatical forms about as often as the frequently studied term *good* Yet there exists little commentary on the ontological status of necessity Russell Winslow argues that when the reader analyzes the Republic through the lens of necessity a novel interpretation emerges On the one hand the concept of necessity articulated in the Republic is original insofar as it includes phenomena not commonly attributed to necessity Namely necessity governs not only those motions that do not vary and cannot be otherwise but also those that wander randomly by erotic desire and by chance Necessity in the Republic thus occasions a rethinking of what this crucial concept might mean for us On the other hand interpreting the Republic through the lens of necessity allows a reading of Plato to develop that emphasizes the structures of finitude in human life and the limits of reason This book argues therefore that philosophy remains subtended and limited by necessity in unavoidable ways

Seeing the Light Thomas DeGloma,2014-11-26 The chorus of the Christian hymn *Amazing Grace* reads I once was lost but now am found Was blind but now I see Composed by a minister who formerly worked as a slave trader the song expresses his experience of divine intervention that ultimately caused him to see the error of his ways This theme of personal

awakening is a feature of countless stories throughout history where the lost and the blind are saved from darkness and despair by suddenly seeing the light In *Seeing the Light* Thomas DeGloma explores such accounts of personal awakening in stories that range from the discovery of a religious truth to remembering a childhood trauma to embracing a new sexual orientation He reveals a common social pattern When people discover a life changing truth they typically ally with a new community Individuals then use these autobiographical stories to shape their stances on highly controversial issues such as childhood abuse war and patriotism political ideology human sexuality and religion Thus while such stories are seemingly very personal they also have a distinctly social nature Tracing a wide variety of narratives through nearly three thousand years of history *Seeing the Light* uncovers the common threads of such stories and reveals the crucial little recognized social logic of personal discovery
