Anglo Saxon Period Test Answers:

The Anglo-Saxon World Nicholas J. Higham, M. J. Ryan, 2013-07-30 The Anglo Saxon period stretching from the fifth to the late eleventh century begins with the Roman retreat from the Western world and ends with the Norman takeover of England. Between these epochal events many of the contours and patterns of English life that would endure for the next millennium were shaped. In this authoritative work N J Higham and M J Ryan reexamine Anglo Saxon England in the light of new research in disciplines as wide ranging as historical genetics, paleobotany, archaeology, literary studies, art history and numismatics. The result is the definitive introduction to the Anglo Saxon world enhanced with a rich array of photographs, maps, genealogies and other illustrations. The Anglo Saxon period witnessed the birth of the English people, the establishment of Christianity and the development of the English language. With an extraordinary cast of characters, Alfred the Great, the Venerable Bede, King Cnut, a long list of artistic and cultural achievements, Beowulf, the Sutton Hoo ship burial, finds, the Bayeux Tapestry and multiple dramatic events, the Viking invasions, the Battle of Hastings, the Anglo Saxon era lays legitimate claim to having been one of the most important in Western history.

The Landscape Archaeology of Anglo-Saxon England N. J. Higham, Martin J. Ryan, 2010 The Anglo Saxon period was crucial to the development of the English landscape but is rarely studied. The essays here provide radical new interpretations of its development. Traditional opinion has perceived the Anglo Saxons as creating an entirely new landscape from scratch in the fifth and sixth centuries AD, cutting down woodland and bringing with them the practice of open field agriculture and establishing villages. Whilst recent scholarship has proved this simplistic picture wanting, it has also raised many questions about the nature of landscape development at the time, the changing nature of systems of land management and strategies for settlement. The papers here seek to shed new light on these complex issues. Taking a variety of different approaches and with topics ranging from the impact of coppicing to medieval field systems, from the representation of the landscape in manuscripts to cereal production and the type of bread the population preferred, they offer striking new approaches to the central issues of landscape change across the seven centuries of Anglo Saxon England, a period surely foundational to the rural landscape of today. NICHOLAS J HIGHAM is Professor of Early Medieval and Landscape History at the University of Manchester. MARTIN J RYAN lectures in Medieval History at the University of Manchester.
