Surreal Entanglements Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction In contrast to universalist and essentializing ways of responding to new material realities VanderMeer's work invites us to re-imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today the ecological technological aesthetic epistemological and political challenges of life in the Anthropocene era Situating these messy multi-scalar material complexities of life in close relation to their ecological material and colonialist histories his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight The collection measures VanderMeer's work as a new kind of speculative surrealism his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio-technologies The first collection to survey academic engagements with VanderMeer this book brings together scholars in the fields of environmental literature science fiction genre studies American literary history philosophy of technology and digital cultures to reflect on the environmentally culturally aesthetically and politically central questions his fiction poses to predominant understandings of the Anthropocene

Acceptance Jeff VanderMeer, 2015 A contemporary masterpiece Guardian THE THIRD VOLUME OF THE EXTRAORDINARY SOUTHERN REACH TRILOGY NOW A MAJOR MOTION PICTURE WRITTEN AND DIRECTED BY ALEX GARLAND EX MACHINA AND STARRING NATALIE PORTMAN OSCAR ISAAC GINA RODRIGUEZ AND TESSA THOMPSON One last desperate team embarks across the border determined to reach a remote island that may hold the answers they've been seeking As they press deeper into the unknown the threat to the outside world becomes only more daunting The mysteries of Area X may have been solved but their consequences and implications are no less profound or terrifying

Future Folk Horror Simon Bacon, 2023-07-24 Future Folk Horror Contemporary Anxieties and Possible Futures analyzes folk horror by looking at its recent popularity in novels and films such as The Ritual 2011 The Witch 2015 and Candyman 2021 Countering traditional views of the genre as depictions of the monstrous rural and pagan past trying to consume the present the contributors to this collection posit folk horror as being able to uniquely capture the anxieties of the twenty-first century caused by an ongoing pandemic and the divisive populist politics that have arisen around it Further this book shows how through its increasing

intersections with other genres such as science fiction the weird and eco criticism as seen in films and texts like *The Zero Theorem* 2013 *The Witcher* 2007 2021 and *Annihilation* 2018 as well as through its engagement with topics around climate change racism and identity politics folk horror can point to other ways of being in the world and visions of possible futures

The Apocalyptic Dimensions of Climate Change Jan Alber, 2021-09-07 Climate change and the apocalypse are frequently associated in the popular imagination of the twenty first century This collection of essays brings together climatologists theologians historians literary scholars and philosophers to address and critically assess this association The contributing authors are concerned among other things with the relation between cultural and scientific discourses on climate change the role of apocalyptic images and narratives in representing environmental issues and the tension between reality and fiction in apocalyptic representations of catastrophes By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change By evoking a sense of collective human destiny in the face of the ultimate catastrophe apocalyptic narratives have both cautionary and inspirational functions Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims of this book *Acceptance* Jeff

VanderMeer, 2014-09-02 The New York Times bestselling final installment of Jeff VanderMeer's wildy popular Southern Reach Trilogy It is winter in Area X the mysterious wilderness that has defied explanation for thirty years rebuffing expedition after expedition refusing to reveal its secrets As Area X expands the agency tasked with investigating and overseeing it the Southern Reach has collapsed on itself in confusion Now one last desperate team crosses the border determined to reach a remote island that may hold the answers they've been seeking If they fail the outer world is in peril Meanwhile *Acceptance* tunnels ever deeper into the circumstances surrounding the creation of Area X what initiated this unnatural upheaval Among the many who have tried who has gotten close to understanding Area X and who may have been corrupted by it In this last installment of Jeff VanderMeer's Southern Reach trilogy the mysteries of Area X may be solved but their consequences and implications are no less profound or terrifying *Critical Modesty in Contemporary Fiction* Thom Dancer, 2021 From climate catastrophe to pandemics and economic crises the problems facing humanity are dizzyingly complex and increasingly planetary in scale *Critical Modesty in Contemporary Fiction* argues for contemporary fiction's capacity to help those who may feel despair at the enormity of such problems not as one might think through the ambitious search for grand solutions but rather by inculcating a temperament of modesty This new temperament of critical modesty locates the fight for freedom and human dignity within the limited and compromised conditions in which we find ourselves Through readings of Ian McEwan Zadie Smith J M Coetzee and David Mitchell this volume shows how contemporary works of literature model modesty as a critical temperament Exploring modest forms of entangled human agency that represent an alternative to the novel of the large scale that have been most closely associated with the Anthropocene it makes the

surprising yet compelling case that precisely by adopting a modest stance the novel actually has the potential to play a more important socio cultural role In doing so the book offers an engaging response to the debate over critical and surface readings bringing novels into the conversation and arguing for a fictional mode that is both critical and modest reminding us how much we are already engaged with the world implicated and compromised before we start developing theories writing stories or acting within it

Existential Science Fiction Ryan Lizardi,2022-01-05 This book explores contemporary existential science fiction media including film television and video games and their influence on society s conceptions of memory identity and humanity Most poignantly Ryan Lizardi argues are the ways in which a recent cluster of science fiction media including Gravity 2013 Interstellar 2014 Legion 2017 2019 Westworld 2016 present SOMA 2015 and Death Stranding 2019 among others present a vision of the future that is inextricably tied to an exploration of humanity that is more contemplative and comparative than traditional science fiction The combination of the existential nature of this current trend in science fiction with the genre s ability to manifest these abstract concepts in a generic environment that is historically focused on new frontiers and ideas creates a powerful set of media texts that ask audiences to contemplate what it means to exist think and connect as human beings Scholars of media studies film studies television studies genre studies and philosophy will find this book particularly useful

Novels by Aliens Kate Marshall,2023-10-10 A wide ranging account of the twenty first century s fascination with the weird Twenty first century fiction and theory have taken a decidedly weird turn They both show a marked interest in the nonhuman and in the preternatural moods that the nonhuman often evokes Writers of fiction and criticism are avidly experimenting with strange even alien perspectives and protagonists Kate Marshall s Novels by Aliens explores this development broadly while focusing on problems of genre fiction She identifies three key generic hybrids that harness a longing for the nonhuman the old weird an alternative tradition within naturalism and modernism for the twenty first century s cowboys and aliens cosmic realism the reach for words legible only from space in otherwise terrestrial narratives and pseudoscience fiction which imagines speculative futures beyond human life on earth Offering sharp and surprising insights about a breathtaking range of authors from Edgar Rice Burroughs to Kazuo Ishiguro Willa Cather to Maggie Nelson Novels by Aliens tells the story of how genre became mood in the twenty first century

Radical Botany Natania Meeker,Antónia Szabari,2019-12-03 Succeeds beautifully in discovering and entwining an entire tradition of speculative botany that will reshape plant studies and posthumanist theory Stacy Alaimo author of *Exposed* *Environmental Politics and Pleasures in Posthuman Times* *Science Fiction Technoculture Studies* Book Prize Winner *Radical Botany* excavates a tradition in which plants participate in the effort to imagine new worlds and envision new futures Modernity the book claims is defined by the idea of all life as vegetal Meeker and Szabari argue that the recognition of plants liveliness and animation as a result of scientific discoveries from the seventeenth century to today has mobilized speculative creation in fiction cinema and art Plants complement and challenge notions of human life *Radical Botany* traces the implications of the speculative mobilization of plants for feminism queer studies and posthumanist thought If as Michael Foucault has argued the notion of the human was born at a particular historical moment and is now nearing its end *Radical Botany* reveals that this origin and endpoint are deeply informed by vegetality as a form of pre and posthuman subjectivity The trajectory of speculative fiction which this book traces offers insights into the human relationship to animate matter and the technological mediations through which we enter into contact with the material world Plants profoundly shape human experience from early modern absolutist societies to late capitalism s manipulations of life and the onset of climate change and attendant mass extinction A major intervention in critical plant studies *Radical Botany* reveals the centuries long history by which science and the arts have combined to posit plants as the model for all animate life and thereby envision a different future for the cosmos
