worried about a vitamin deficiency or wonder if you're lacking the feel good brain hormone serotonin or even if you just want to ensure you're not wasting your money on supplements you'll learn what simple steps to take to test yourself. Wylde surveys and individually rates an array of present day natural remedies from a no nonsense evidence based perspective. He takes us on a guided tour of today's hottest health trends highlighting what is good and steering us away from what is dubious or outright snake oil. Underlying Wylde's ratings is the very latest research and he makes it clear that in the face of the astronomical rise in disease and the ubiquity of nutrient devoid foods we have no choice but to supplement our diets with vitamins, minerals and antioxidants if we want to live to our fullest potential. Finally Wylde on Health explores how we will increasingly use the strategic supplementation he recommends to redress genetic predispositions, the future of preventative health care.
