Deutsches und europäisches Kartellrecht unter Berücksichtigung des "more economic approach" Peter Ondrejka, 2011 Die Europäische Kommission versucht seit einigen Jahren das europäische Kartellrecht grundlegend zu reformieren indem sie eine tiefgreifende Ökonomisierung des Rechts anstrebt Die vorliegende Arbeit setzt sich mit dieser als more economic approach bekannten Entwicklung auseinander und legt ihren Schwerpunkt auf die hochaktuellen Entwicklungen im Bereich der europäischen Missbrauchsaufsicht Bevor auf die konkreten Reformbestrebungen der Kommission eingegangen wird befasst sich die Arbeit zunächst mit grundlegenden Fragen zum Wettbewerb Dabei werden sowohl verschiedene Definitionen als auch Ausgestaltungen des Wettbewerbs dargestellt Gleichzeitig wird ein Querschnitt über die wettbewerbstheoretischen Grundlagen des Wettbewerbsrechts dargeboten der im Ergebnis eine Vielzahl völlig gegenteiliger Theorien erkennen lässt

Im nächsten Schritt wird die Entstehung des europäischen Wettbewerbsrechts beleuchtet und festgestellt dass das europäische Wettbewerbsrecht vor allem in den Anfängen unter grossem Einfluss deutscher Wettbewerbsideologie und deutscher Rechtspersonlichkeiten stand Um eine gedankliche Stütze bei der Bewertung der angebahnten Reform zu gewinnen wird folglich die Struktur des deutschen Gesetzes gegen Wettbewerbsbeschränkungen GWB dargestellt und auf die Besonderheiten und konzeptionellen Unterschiede zum europäischen Wettbewerbsrecht hingewiesen Nachfolgend werden die Ecksaulen der unter dem Namen more economic approach angebahnten Reform skizziert Anhand der umfassenden Kritik in der Literatur werden die angeblichen Vorteile der Reform sowie angeblichen Unzulänglichkeiten der bisherigen Rechtsprechung der Europäischen Gerichte schematisch dargestellt Anschliessend wird eine umfassende und detaillierte Analyse der bisherigen Rechtsprechung anhand von Fallgruppen durchgeführt und diese mit den Reformvorschlägen der Kommission verglichen Anhand des durchgeführten Vergleichs werden vom Autor erhebliche Unterschiede sowohl in der Zielsetzung

The Internationalisation of Competition Rules Brendan J. Sweeney, 2009-09-10 The widespread move towards more market driven models of political economy combined with the expanding internationalisation of business and commerce has led to a series of proposals for global competition rules To date these proposals have been hotly contested A critical issue is whether some form of international rule making is required or whether soft law solutions are sufficient Competition rules may be required to combat the damage done by global cartels and to diffuse the tensions created when more than one nation seeks to regulate the same conduct Competition rules may also be required to protect the integrity of the world trading system International rule making however presents its own problems not the least of which is a concern with protecting national sovereignty

Antitrust Settlements Giovanna Massarotto, 2019-10-17 Competition enforcement authorities use settlements as a tool to ensure compliance with antitrust law Companies can make commitments to remedy breaches ensuring that they avoid litigation and potential fines and reputational damage The author of this highly original and innovative book shows that rather than fines or arguing principles of competition law in litigation antitrust settlements namely U S consent decrees and EU commitment decisions hold the key to globally effective enforcement particularly in the digital and blockchain era Antitrust law does not necessarily need to be abolished but rather should be fully exploited as an economic regulation led by antitrust settlements In supporting her thesis the author examines such elements of competition enforcement as the following drawbacks of allowing the courts to regulate markets whether antitrust settlements sacrifice antitrust deterrence how settlements rapidly and surgically regulate markets comparative analysis between U S consent decrees and EU commitment decisions economic analysis on the adoption of antitrust settlements in both the U S and EU markets from 2013 to 2018 fundamental role of antitrust settlements in regulating the current digital markets and comprehensive description on how to use antitrust settlements to regulate the data industry With its thorough guidance on U S consent decrees and EU commitment decisions from their functioning to their characteristics and procedure

and its extensive treatment of the main antitrust remedies available and used in enforcing of antitrust law in both the U S and EU the book provides both an economic and a legal analysis of the functioning and the scope of antitrust settlements It assesses the influence of decisions on companies behavior and agencies practice using economic analysis to show the procompetitive or anticompetitive effects of remedies with special attention to digital markets Because markets have become so dynamic and unpredictable that is difficult to preserve efficiency the author says there is a little room for law economic regulation is a better fit This book is a springboard to further investigate how a simple antitrust enforcement tool having turned competition law into an economic regulation policy can drive our economy leading both the antitrust and regulatory interventions in tackling today s market challenges *European Competition Law Annual 2007* Claus-Dieter Ehlermann,Mel Marquis,2008-11-28 This is the twelfth in a series on EU Competition Law and Policy produced by the Robert Schuman Centre of the European University Institute in Florence The volume reproduces the written contributions and transcripts in connection with a roundtable debate which examined the EU s enforcement policy as regards the abuse of a dominant position under Article 82 EC The workshop participants included senior enforcement officials and policy makers from the European Commission from the national competition authorities of certain EU Member States and from the US Department of Justice and Federal Trade Commission and renowned international academics legal practitioners and professional economists In an intense intimate environment this group of experts debated a number of legal and economic issues structured according to three broad lines of discussion 1 comparisons of the concept of monopolization under Section 2 of the Sherman Act with that of abuse of dominance under Article 82 EC 2 a reformed approach to exclusionary unilateral conduct and 3 exploitative unilateral conduct and related remedies *The Anticompetitive Impact of Regulation* Giuliano Amato,Laraine L. Laudati,2001-01-01 This timely book addresses the important issue of the negative effects of anticompetitive regulation on industry and the massive economic harm it causes The distinguished contributors including economic and legal scholars advocate the need for a review of all anticompetitive laws and address several industry and country case studies with the ultimate aim of providing recommendations to eliminate the impact of anticompetitive regulation The first part of the book considers regulations affecting private business and professions part two covers public utility and public services regulation whilst part three discusses the role of institutions and competition authorities in relation to anticompetitive practices The authors draft guidelines based on economic evidence and legal arguments which they believe would provide a starting point for the European Union to address the problem They go on to propose possible implementation strategies for these guidelines from both an institutional and legal perspective The book also includes a historical perspective on the evolution of anticompetitive regulation complemented by an overview of the actions currently being implemented to address and reverse the problem in other jurisdictions **Private Regulation and the Internal Market** Mislav Mataija,2016-03-11 How does EU internal market law in particular the rules on free movement and

competition apply to private regulation What issues arise if a bar association were to regulate advertising when a voluntary product standard impedes trade or when a sporting body restricts the cross border transfer of a football player Covering the EU's free movement and competition rules from a general and sector specific angle focusing specifically on the legal profession standard setting and sports this book is the first systematic study of EU economic law in areas where private regulation is both important and legally controversial Mislav Mataija discusses how the interpretation of both free movement and competition rule adapts to the rise of private regulation and examines the diminishing relevance of the public private distinction As private regulators take on increasingly important tasks the legal scrutiny over their measures becomes broader and moves towards what Mataija describes as regulatory autonomy This approach broadly disciplines but also recognizes the legitimacy of private regulators granting them an explicit margin of discretion and focusing on governance and process considerations rather than on their impact on trade and competition The book also demonstrates how the application of EU internal market law fits in the context of strategic attempts by the EU institutions to negotiate substantive reforms in areas where private regulation is pervasive Surveying recent case law of the Court of Justice of the European Union and the practice of the European Commission Mataija demonstrates how EU internal market law is used as a control mechanism over private regulators
