New Wests and Post-Wests Paul S. Varner,2013-10-03 The writers of these chapters are often working with changing assumptions about literary and media interpretations of an American West Here we see critical approaches to a West that never was a West of myth so enduring that the myth dominates nearly all artistic representation about this place that never was In this collection we see critical approaches to a New West a West that is a state of mind not a geographical place but a mythic space with no boundaries and no political inevitabilities These New Western studies accept the idea of a West that includes Canada Mexico Alaska and in the case of the US every geographic and historical point west of the historic founding settlements The West we

study today is a post West an idea of the West past the traditional views of an old West dominated by white US nationalism and gendered as uncompromisingly masculine The idea itself of a single West no longer holds validity We now understand that all renderings of the West are renderings of multiple Wests Wests constructed by American nationalists Wests constructed by EuroAmerican writers and filmmakers Wests constructed by native peoples or Wests constructed outside the geographical boundaries of the US This collection presents an eclectic array of new scholarship ranging freely over the New Wests and Post Wests dealing with issues such as the literature of a 1950s California West eco crime genre fiction the West of Edward Dorn and the Beat Movement images of prostitution in California Gold Rush literature European perspectives on film representations of the first peoples the six shooter and the American West German Westerns and Italian Westerns The Authentic Death of Hendry Jones by Charles Neider and films such as The Treasure of Sierra Madre Into the Wild There Will Be Blood and The Last Picture Show A unique aspect of this collection is the range of writers interpreting the American West in film and literature besides those writing from within the United States five of the writers provide international perspectives from the United Kingdom and the Universities of Tunis Vienna and Rome Each chapter includes a review of scholarship on its subject and an extended bibliography for further research

The Geopolitics of Culture John Van Oudenaren,2024-06-15 Through the lens of James Billington and the institution he led as Librarian of Congress during a key period of US Russian relations The Geopolitics of Culture examines culture as a neglected area of US foreign policy Billington advised presidents and members of Congress and mobilized the resources of the Library of Congress to promote reform in Russia He believed that rather than preaching to the Russians the United States should expose the rising generation of Russian leaders to what was best in America and encourage them to rediscover positive elements in pre Bolshevik Russian culture The Geopolitics of Culture is the first book to chronicle Billington s influence on US engagement with Russia as it transitioned from communism to democracy under Gorbachev and Yeltsin and back to authoritarianism under Yeltsin and Putin Drawing on published and archival sources including recently released papers and interviews with current and retired Library of Congress staff members John Van Oudenaren casts new light on this era Billington s efforts led to a remarkable degree of cooperation between the Library of Congress and Russian cultural and political institutions Yet these efforts ultimately failed as Putin turned back toward authoritarianism The experience of the Library of Congress during this period nonetheless holds important lessons for today Billington believed that a transition to democracy in Russia was essential if the United States was to head off the geopolitical nightmare of a Eurasia dominated by an alliance of hostile authoritarian powers The geopolitics of culture thus remains a challenge for US foreign policy
