Asian/American Curricular Epistemicide Nicholas D. Hartlep, Daniel P. Scott, 2016-08-18 In this important book Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans As Hartlep and Scott write Asian Americans have once again been constructed as the good minority that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality Over and over again the media has been telling a single story about Asian Americans to the public for the past fifty years The consequence of this fabricated story is that it discourages others even Asian Americans themselves from believing in the validity of their struggles Linshi 2014 p 1 Studies in World History Volume 3 (Teacher Guide) James P. fascination with transcontinental automobile touring Americans began to reconnect with the past and interact with the history of Western expansion by becoming a new breed of frontier explorer via their cars As a result early emphasis on local plaques and monuments yielded to pageants reenactments and ultimately attempts to retrace the route promoting conservation and recreation along its length Wallace G Lewis details the ingenuity that inspired the establishment of the Lewis and Clark National Historic Trail opening a window to how America reimagines recreates and remembers its own past In the Footsteps of Lewis and Clark will appeal to both scholarly and armchair historians interested in the Western frontier as experienced by both Lewis and Clark and those retracing their steps today Exploring America in the 1990s Molly Sandling, Kimberley Chandler, 2021-09-03 Exploring America in the 1990s New Horizons is an interdisciplinary humanities unit that looks at literature art and music of the 1990s to provide an understanding of how those living through the decade experienced and felt about the world around them Through the lens of identity it explores life in America and the myriad groups that coexisted in harmony and often with friction Cultural movements like grunge and Generation X will be examined alongside larger issues such as rising racial tensions following the O J Simpson trial and Rodney King riots the conflict between progress and morality as scientific advances in cloning and the Internet changed the U S and the growing debate over previously marginalized identities and gay rights following Don t Ask Don t Tell and DOMA The unit uses field tested instructional strategies for language arts and social studies from The College of William and Mary as well as new strategies and it includes graphic organizers and other tools for analyzing primary sources Grades 6 8 **Eleven Thousand Five Hundred Ninety-three**, 1976 Information pursuant to responsibilities of the Secretary of the Interior Section 3 Executive Order 11593 *American Hour* Os Guinness, 1993-05-30 Os Guinness examines the ways in which the current crisis of cultural authority strikes at the heart of American identity As he shows this crisis has occurred because America s beliefs traditions and ideals civic as well as religious are losing their power to shape the private and public lives of countless Americans He first charts this growing crisis in America s moral and cultural order tracing its roots early in this century to the first open phase of conflict which began to build in the fifties and climaxed in the cultural revolution of the sixties He goes on to examine the subsequent conservative counter revolution focusing throughout on the impact of this crisis on three areas vital to the health of the republic on American identity as in the currently contested notion of what it means to be an American American public philosophy including the now controversial relationship of religion and public life and American republican character including our distinctive emphasis on the importance of the habits of the heart Guinness also examines the historical role of religion in American society and its integral function in American public life He explores how religion came to lose its power as a vital shaping force of America s moral and cultural order and he considers the consequences of this loss He then establishes four scenarios that range from the continued decline of religion in public life to a resurgence of faith showing how each possible outcome could affect American society in the upcoming century Examining closely the

recent controversies over religion and politics Guinness concludes by setting forth a vision of how we can move beyond these struggles and provide America's diverse faiths with a revitalized and constructive role in public life From publisher's description **The Historian and Film** Paul Smith,1976-01-29 Film is increasingly engaging the attention of students of history at all levels In its manifold forms from the newsreel to the feature it is a major source of evidence for and an important influence upon contemporary history and a vivid means of bringing the recent past to life For earlier periods it provides a medium in which the often widely dispersed visual evidences of the past can be brought together for the student It offers the historian a new form in which to interpret and present his subject and as television has shown it is by far the most important vehicle for the presentation of history to mass audiences The analysis of its content and impact and the exploration of its uses are especially fitted to bring history into an interdisciplinary relationship with other fields from sociology to the visual arts Prep School Cowboys Melissa Bingmann,2015-02-01 Ranch schools in Arizona California New Mexico and Wyoming in the 1920s and 1930s portrayed that the West embodied the moral attributes believed to be lacking in urban America Advocates of character education saw the courage and self reliance of the Old West as the qualities necessary to preserve the nation through the next generation Bingmann uses ranch schools designed to counteract the problems of inherited wealth as a lens through which to examine citizenship class gender and region during this era while illustrating that these schools in transmitting such values to American youth created a network of elite private schools that gave pampered boys from the urban centers of the Atlantic Seaboard and Great Lakes region the opportunity to grow into gentlemen cowboys ready to take the reins of power in family businesses and government
