maintenance of linguistic diversity **Discourse Analysis** Patricia Canning, Brian Walker, 2024-01-31 Discourse Analysis provides an essential and practical introduction for students studying modules on the analysis of language in use. It explores the ways in which language is used and organised in written and spoken texts to generate meanings and takes into account the social contexts of production and the social roles and identities of those involved. Investigating the ways in which language varies according to subject, social setting and communicative purpose, this book examines various forms of speaking and writing, including casual conversation, speeches, parliamentary debate, computer-mediated communication and mass media articles. It discusses topics including how we convey more than we actually say or write, the role of politeness and impoliteness in communication and what makes texts cohesive and coherent. It also shows how particular aspects of discourse analysis can be assisted by corpus methods and tools. Taking students through a step-by-step guide on how to do discourse analysis that includes the collection of data and presentation of results, the book also documents a text analysis project from start to finish. Featuring a range of examples and interactive activities as well as additional online support material, this book is key reading for those studying discourse analysis modules.

Globalising Sociolinguistics Dick Smakman, Patrick Heinrich, 2015-05-15 This book challenges the predominance of mainstream sociolinguistic theories by focusing on lesser-known sociolinguistic systems from regions of Africa, Asia, the Caribbean, South America, the European Mediterranean and Slavic regions, as well as specific speech communities such as those speaking Nivkh, Jamaican Creole, North Saami and Central Yup'ik. In nineteen chapters, the specialist authors look at key sociolinguistic aspects of each region or speech community, such as gender, politeness strategies, speech patterns and the effects of social hierarchy on language, concentrating on the differences from mainstream models. The volume introduced by Miriam Meyerhoff has been written by the leading expert of each specific region or community and includes contributions by Rajend Mesthrie, Marc Greenberg and Daming Xu. This publication draws together connections across regions, communities and considers how mainstream sociolinguistics is incomplete or lacking. It reveals how lesser-known cultures can play an important role in the building of theory in sociolinguistics. Globalising Sociolinguistics is essential reading for any researcher in sociolinguistics and language variation and will be a key reference for advanced sociolinguistics courses.
