and veterinary assistants of all experience levels A Concise History of Veterinary Medicine Susan D. Jones, Peter A. Koolmees, 2022-08-25 From Ayurvedic texts to botanical medicines to genomics ideas and expertise about veterinary healing have circulated between cultures through travel trade and conflict In this broad ranging and accessible study spanning 400 years of history Susan D Jones and Peter A Koolmees present the first global history of veterinary medicine and animal healing Drawing on inter disciplinary and multi disciplinary perspectives this book addresses how attitudes toward animals disease causation theories wars problems of food insecurity and the professionalization and spread of European veterinary education have shaped new domains for animal healing such as preventive medicine in intensive animal agriculture and the need for veterinarians specializing in zoo animals wildlife and pets It concludes by considering the politicization of animal protection changes in the global veterinary workforce and concerns about disease and climate change As mediators between humans and animals veterinarians and other animal healers have both shaped and been shaped by the social cultural and economic roles of animals over time Ethics of Animal Use Peter Sandøe, Stine B. Christiansen, 2013-05-30 An interesting and accessible introduction to ethical issues raised by various forms of human use of animals This textbook avoids moral lecturing and presents a range of ethical viewpoints without defending or applying any specific stance Readers are encouraged and provoked to reflect for themselves and to sharpen their own points of view regarding the ethical limits on our use of animals They will also gain further understanding of the views held by other people Early chapters of this interdisciplinary book cover changes over time in our view of animals the principles of animal ethics and different views of what counts as a good animal life Later chapters apply the conceptual tools to specific issues including food animal production advanced veterinary treatment of pets control of infectious diseases wildlife management as well as the use of animals in research Specifically designed for students of veterinary medicine animal science welfare and behaviour and veterinary nursing Also of interest to those wanting to combine an up to date science based account of animal issues with clear headed moral reflection The book covers an impressive range of topics with accuracy and fairness Despite its ambitious scope the authors have achieved remarkable unity in the book and have produced a book that is easy and pleasant to read Their work will surely provide a major tool for rationalizing the debate about the ethics of animal use and I commend them for their invaluable contribution From the Foreword by Professor Bernard Rollin Colorado State University Sustainable governance and management of food systems Eija Vinnari, Markus Vinnari, 2023-08-07 This book focuses on the role of governance and management in the food chain These methods are now especially important as the current food system has been found to inflict unsustainable environmental pressures on our planet These include but are not limited to greenhouse gas emissions biodiversity loss excessive water usage and problems with nutrition cycles In addition issues such as the treatment of farm animals has attracted considerable media and public attention from the ethical point of view Therefore the prominent questions discussed in this book are What are the most important ethical issues in our fisheries agriculture and

food systems How should we govern food systems when sustainability is a key goal What kind of management tools are available for this purpose Who is responsible for making the agriculture and food system more sustainable animal life: a start for ethical debate Franck L.B. Meijboom, Elsbeth N. Stassen, 2023-08-07 Killing animals is common practice yet it is not morally neutral. The end of animal life is related to many societal and ethical questions and concerns Questions such as how long should we continue to treat an animal before putting it down But also the question whether it could be legitimate to kill individual animals for the welfare of the herd or of future generations. The ongoing public and academic discussions on these and on other well known questions like those related to the killing of animals for food or for scientific purposes show that there is no one standard evaluation of animal life This book is an edited volume that enables the reader to get a grip on that plurality of views with regard to animals It helps to deal with the many questions related to the end of animal life The chapters show how the plurality of views on killing animals is related to moral presuppositions by providing a clear overview of the ethical views on end of life decisions Furthermore the book contains a number of applied studies of the ethical questions related to killing animals in various practices including small animal practice wildlife management fishing and fish farming animal experimentation and livestock farming These chapters can help veterinarians scientists students policy makers and many other professionals working with animals to easily get a good overview of the issues at stake and may contribute to responsible decision making with regard to the end of animal life **Veterinary and** Animal Ethics Christopher Wathes, Sandra Corr, Stephen May, Steven McCulloch, Martin Whiting, 2012-10-03 The first International Conference on Veterinary and Animal Ethics ICVAE held in September 2011 saw leading experts from across the world come together to discuss the most important issues of animal welfare in contemporary veterinary practice and research This is the extended proceedings of that conference enabling all those interested in this increasingly significant subject to benefit from the insights of those discussions The conference was divided into four sessions Principles of veterinary and animal ethics Justifying ends the morality of animal use Ethical analyses of animal use and Cultural political legal and economic considerations Each session contained four or five papers and these are presented here in full as well as the transcribed question and answer sessions at the end of each paper and a short post presentation reflection from each author Also included is the debate on the motion Is it better to have lived and lost than never to have lived at all which records three prepared responses to the question as well as registrants comments from the floor KEY FEATURES Contributions from the leading thinkers in veterinary and animal ethics today Includes stimulating challenging thought provoking and sometimes controversial discussions Addresses key questions on the role of the veterinarian and the morality of animal use as well as our impact on wildlife Provides guidance on the practical application of ethical principles and the problems encountered Published as part of the UFAW Animal Welfare book series See www wiley com go ufaw for more details Räume der Mensch-Tier-Beziehung(en) Clemens Wustmans, Niklas Peuckmann, 2020-04-01 Ob abstrakt oder
