Putinism - Post-Soviet Russian Regime Ideology Mikhail Suslov, 2024-02-23. A key question for the contemporary world: What is Putin's ideology? This book analyses this ideology, which it terms Putinism. It examines a range of factors that feed into the ideology: conservative thought in Russia from the nineteenth century onwards; Russian and Soviet history and their memorialisation; Russian Orthodox religion and its political connections; a focus on traditional values and Russia's sense of itself as a unique civilisation, different from the West and due a special, respected place in the world. The book highlights that although the resulting ideology lacks coherence and universalism comparable to that of Soviet era Marxism-Leninism, it is nevertheless effective in aligning the population to the regime and is flexible and applicable in different circumstances. And that therefore it is not attached to Putin as a person, is likely to outlive him, and is potentially appealing elsewhere in the world, outside Russia, especially to countries that feel belittled by the West and let down by the West's failure to resolve problems of global injustice and inequality.

Political Theory Andrew Heywood, Clayton Chin, 2023-02-23. While Western modern political thought has been a story of inclusion, it has also been one of continued exclusion and new forms of political oppression and silencing. This is why political theory is so necessary today. Political thought is diverse. From liberal theories laying out ideal democratic institutions to critical analyses of postcolonial settler states to conceptual analyses of the nature of freedom, there are very different approaches, topics, and aims within the tradition of Western political theory. What binds these diverse forms of thinking together? How do they help us to understand political institutions, life, behaviour, and events? How do they help us to make decisions in the complex world of politics? This book significantly revised and reconceptualized introduces you to the modern discipline of political theory in the Western tradition, tackling its key debates, concepts, problems, and traditions. What is the nature of political concepts? What problems do they pose to thinkers and political actors? How have modern political thinkers usually approached thinking about politics? How has this been problematized in contemporary debates? Has modern politics fundamentally ignored economically impoverished groups, women, indigenous peoples, racialized groups, and the natural environment? How have ideas like freedom, equality, sovereignty, and the state been conceptualized in the modern tradition? What tensions has this given rise to? Delving into topics as diverse as Maoism, postcolonialism, and white supremacy, boxed features give you room to explore and expand.
