Buffer Annuities Cfp Mark J Orr, 2021-08-13 In 2021 and beyond retirees will need better income withdrawal and Required Minimum Distribution RMD strategies to survive a 25 30 retirement Why The Problems The traditional 60 40 portfolio 60% stocks and 40% bonds and the 4% Rule can no longer be counted on for not outliving your money in retirement You will learn precisely why the author and so many others believe this as you read more of this book description Solution The use of BUFFER ANNUITIES can radically improve the probability of retirement success of both the 60 40 portfolio and the suspect 4% rule BUFFER ANNUITIES are the author's name for a little known tiny subset of fixed annuities and are a vital ingredient of this simple IRA withdrawal strategy During 2019 and 2020 JP Morgan Bank of America and Barron's declared that the 60 40 portfolio should NOT be relied upon going forward So what is Wall Street's current collective advice for retirees Buy more stocks instead of bonds But most retirees do not want more stock market risk They don't want a repeat of 2008 What about having a 60% or more allocation for stocks Is this the right time for owning a higher percentage of equities if you are already in or near retirement Yale economics professor and Nobel prize winner 2013 Robert Shiller's CAPE ratio is a well known indicator of future stock returns CAPE stands for the Cyclically Adjusted Price to

Earnings ratio The higher the CAPE ratio the lower the expected returns are likely to be over the next decade As of August 2021 the CAPE ratio was 38 That is 93% above the modern era market average of 19.6 A CAPE in the high 30s could mean stocks should only provide average returns of less than 5% over the next ten years And mutual fund giant Vanguard agrees that the returns over the next decade will be NOTHING like the last If the 60/40 portfolio cannot be relied upon as a safe way to invest money what about the 4% Rule The 4% Rule says you can only take out 4% of your savings each year adjust it for inflation each year and you have a 90% chance of your savings lasting 30 years If you have 1,000,000 your 1st year's safe withdrawal is 40,000 It doesn't sound like a million bucks will provide for a millionaire's lifestyle We just saw how stocks might be riskier than usual What about bonds This book is a must read if you too are wary of bonds with their meager current interest rates BUFFERS can easily provide 4% 5% 6% or much higher average returns with none of the risks inherent with bonds credit risk interest rate risk inflation risk Dr Wade Pfau CFA told Forbes in 2015 bonds don't belong in a retirement portfolio And that was when interest rates were two times higher than today He also said with the current low interest rates of virtually all bonds and the credit risks of all non US Treasuries plus interest rate risk for all bonds bonds should play no more than a minor role in a retirement portfolio He still believes and teaches that to financial advisors across the country today Do you dislike paying fees for bond mutual funds or ETFs or to a financial advisor If so BUFFERS have no mandatory fees or expenses Zero costs But most importantly of all if you are looking for an almost fool proof 3 step income withdrawal or RMD system this book is a must read Like any fixed annuity BUFFER ANNUITIES are considered safe investments and a near perfect bond alternative that will likely outperform bonds and stocks as well if Dr Shiller and Vanguard are correct The bottom line This book teaches a proven common sense withdrawal strategy for improving the likelihood that you will never run out of retirement money And do so without the risks and fees associated with bond funds and ETFs

20 years when you need them In many cases what you think you bought is not what they sold you Many of these insurance products are riddled with fine prints that you will need a lawyer to explain the plans to you and after doing the math you may realize that you would be better off to leave your retirement savings alone take the RMD pay the taxes and reinvest the after tax proceeds that you don't need to live on Your calculation may show as mine did that you will leave your heirs more money by following the strategy in this book I believe Retirement Planning is a whole new industry that was created that only a select few actually benefit from If insurance companies lose money by selling permanent life insurance and annuities they will ALL be out of business Follow the steps shown in this book You and your spouse will have 6 million dollars when you reach full retirement age and you will leave more money to your heirs What can be simpler than saving 1000 dollars a month inside your retirement account investing the money wisely so that you will not lose a penny of it earning 10% annual return buying your principal residence and collecting SS benefits at the right time It is time to implement this stress free game plan while you are still young When you stop worrying you start enjoying you start living Life is good Make it even better in retirement
