

ANSI VALVE RATINGS, STANDARDS & DESIGN ASME B16.34

This overview attempts to provide just some of the factors to be considered when selecting and specifying ANSI rated valves. The following information provides some of the design criteria users should evaluate and research when considering ASME valve suitability based on materials, pressure and temperature and interpreting relevant valve standards accordingly.

DESIGN SCOPE

This technical summary describes the design basis and standards that apply to Australian Pipeline Valve (APV) ASME B16.34 (B31 codes) valves and lists pressure-temperature ratings for APV valves and strainers. Australian Pipeline Valve valves covered by ASME standards include ball, check, gate, globe & plug valves as well as strainers.

DESIGN BASIS

Process industry piping systems are designed in accordance with the ASME Codes for Pressure Piping, B31, which specifies design and construction requirements for all types of piping systems. B31.1, 'Power Piping' and B31.3, 'Chemical and Petroleum Refinery Piping', relate to systems that utilise APV products.

PROCESS VALVE STANDARDS

Australian Pipeline Valve ASME rated valves conform to ANSI/ASME B16.34. This standard covers process valves with flanged, butt weld, socket weld and threaded ends. It specifies design requirements, materials, pressure-temperature ratings, dimensions, wall thickness and manufacturing requirements. In the interest of standardisation, B16.34 and its associated standard for flanges, ANSI/ASME B16.5, have established eight pressure classes and many material groups for process system valves and flanges. B16.34 also includes standard minimum wall thickness dimensions for each pressure class. B16.34 and B16.5 list the pressure-temperature ratings for each class and material group.

Materials:- Pressure-containing parts are manufactured from materials listed in B16.34, the B31 codes or ASME Boiler and Pressure Vessel Code Section VIII.

Design:- The design requirements of B16.34, including minimum wall thickness, are used for ASME standard APV valves.
