Citizenship and Immigration - Borders, Migration and Political Membership in a Global Age Ann E. Cudd, Win-chiat Lee, 2016-08-10. This work offers a timely philosophical analysis of interrelated normative questions concerning immigration and citizenship in relation to the global context of multiple nation states. In it, philosophers and scholars from the social sciences address both fundamental questions in moral and political philosophy as well as specific issues concerning policy. Topics covered in this volume include the concept and the role of citizenship, the equal rights and representation of citizens, general moral frameworks for addressing immigration issues, the duty to obey immigration law, the use of ethnic, cultural, or linguistic criteria for selective immigration, domestic violence as grounds for political asylum, and our duty to refugees in general. The urgency of the need to discuss these matters is clear. Several humanitarian crises involving human migration across national boundaries, stemming from war, economic devastations, gang violence, and violence in ethnic or religious conflicts, have unfolded. Political debates concerning immigration and immigrant communities are continuing in many countries, especially during election years. While there have always been migrating human beings, they raise distinctive issues in the modern era because of the political context under which the migrations take place, namely that of a system of sovereign nation states with rights to control their borders and determine their memberships. This collection provides readers the opportunity to parse these complex issues with the help of diverse philosophical, moral, and political perspectives.

Congress, 1951 *The Naked President* Roger Boyes, 1994 100 Things You Should Know about Communism Series United States. Congress. House. Committee on Un-American Activities, 1949 The Foreign Policies of the European Union and the United States in North Africa Francesco Cavatorta, Vincent Durac, 2013-09-13. The war in Iraq seemed to bring to a head underlying differences between the United States and the vast majority of European countries regarding the best means to maintain international peace and stability. The unilateralism of the United States as opposed to the multilateralism of the European Union is seen as a very significant source of potential rivalry between the two actors. This volume examines in detail whether the policies of the United States and the EU are truly diverging with respect to the most pressing issues facing North Africa or whether, in fact, they are converging in terms of objectives to be achieved and strategies for their implementation. Through a number of papers that include both comparative and case-specific studies, this book enables a better understanding of the differences and similarities in EU and US foreign policies and security strategies for the region, a clearer analysis of their respective

democracy promotion policies and a better examination of their respective approach to the Islamist question in light of the continued success of such movements This book was originally published as a special issue of the Journal of North African Studies
