installment of N A M Rodger's definitive authoritative trilogy on Britain's naval history Across two acclaimed volumes preeminent naval historian N A M Rodger has traced the progress of naval warfare in Britain from the seventh century through to Trafalgar combining decades of scholarship with original insights and analysis In this final volume N A M Rodger delivers a magisterial history of the Royal Navy beginning after its defeat of Napoleon and concluding in 1945 with the Second World War At the end of the French and Napoleonic Wars British sea power was at its apogee But by 1840 as one contemporary commentator put it the Admiralty was full of intellects becalmed in the smoke of Trafalgar How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book which refuses to accept standard assumptions and analyses Rodger's comprehensive narrative goes beyond the conduct of war at sea to tell a sprawling story of naval warfare as a national endeavor As in previous volumes the social history of officers and men and now also women has a prominent place Along the way he describes the development and strategic significance of submarine and navy air forces and the rapid evolution of weapons and ships from classic Nelsonian type to hybrid steam sail ships then armor clad and the fully armored Dreadnoughts and beyond He assesses the character and importance of leading admirals Beatty Fisher Cunningham together with the roles of other less famous but no less consequential figures Rodger sets all this in the essential context of politics and geo strategy Based on a lifetime's learning *The Price of Victory* is a masterful culmination of one of the most significant British historical works in recent decades Naval specialists will find much that is new and will be invigorated by the originality of Rodger's judgments but everyone who is interested in one of the central threads in British history will find it rewarding *Historical Dictionary of World War II* Anne Sharp

Chomsky Jacques Pauwels focuses on the big picture Like them he seeks to find the real reasons for the actions of great powers and great leaders Familiar Second World War figures from Adolf Hitler to Franklin D Roosevelt and Joseph Stalin are portrayed in a new light in this book The decisions of Hitler and his Nazi government to go to war were not those of madmen Britain and the US were not allies fighting shoulder to shoulder with no motive except ridding the world of the evils of Nazism In Pauwels account the actions of the United States during the war years were heavily influenced by American corporations IBM GM Ford ITT and Standard Oil of New Jersey now called Exxon who were having a very profitable war selling oil armaments and equipment to both sides with money gushing everywhere Rather than analyzing Pearl Harbor as an unprovoked attack Pauwels notes that US generals boasted of their success in goading Japan into a war the Americans badly wanted One chilling account describes why President Truman insisted on using nuclear bombs against Japan when there was no military need to do so Another reveals that Churchill instructed his bombers to flatten Dresden and kill thousands when the war was already won to demonstrate British American strength to Stalin Leaders usually cast in a heroic mould in other books about this war look quite different here Nations that claimed a higher purpose in going to war are shown to have had far less idealistic motives The Second World War as Jacques Pauwels tells it was a good war only in myth The reality is far messier and far more revealing of the evils that come from conflicts between great powers and great leaders seeking to enrich their countries and dominate the world
