## Chapter 21

### 62 Essay topics for a written assignment assessment in Anatomy & Physiology

An additional form of assessment in anatomy and physiology is by written assignment (an essay). This affords the student the opportunity to research the published literature about a topic and to write about it logically, clearly and succinctly while learning to cite the scientific literature that is referred to. The essay topics given below are intended to be descriptive rather than prescriptive. That is, students are given the freedom to take the essay topic in almost any direction. The statements that follow the essay topic are intended to guide students in deciding what might be included in the essay. Additional material should be included if it is appropriate for your essay.

Students are advised to use a variety of published textbooks such as: Anatomy and Physiology; Physiology; Pathophysiology; Physical science texts, Medical texts, as well as some Journal articles. The essay should show evidence of careful library research from published sources. But not from website pages. WIKIPEDIA and similar sites are not allowed nor are personal/commercial/institutional web pages. Nor are lecture handouts, encyclopaedias or dictionaries. However, e-copies of articles from published journals or books ARE allowed. One purpose of the essay is to research the published scientific literature that is available to anyone, that has undergone the peer scrutiny that commercial publishing requires, and that will be available on the public record "forever".

Another purpose of a written assignment is to provide the opportunity to learn to write a good essay. The researched information must be paraphrased and organised into a logical structure that tells a story. Hence the essay will have an Introduction that will introduce the content of the essay topic by giving some relevant background to set the scene and to explicitly tell the reader what theme or approach to the topic the essay will follow, and what will & will not be discussed. Additionally there should be several descriptive subheadings between the Introduction and Summary that are pertinent to the content of the essay. The Summary briefly reiterates the major points that were made in the essay without introducing any new material.

The three step marking procedure that I use for essays is:

1. Mark a draft (say for a nominal 5 marks). This is intended to stimulate students into beginning their essay in a timely manner. Not all students choose to submit a draft.
2. Mark the essay (say out of 40 marks) and provide extensive critical comments for the student. The intention is: to identify any shortcomings; to provide guidance on how to improve the essay and; to grade the student relative to their peers. Students are required to revise their essays.
3. Mark the revised essay (say out of 20 marks). All students are required to revise their essay while addressing the marker's comments. The second marking is a brief marking, merely checking that all the marker's comments were addressed; looking at what the student modified for themselves; and scoring the summary.

At step 2, I usually contact students whose essay is scored at less than half marks (because it is really bad) and tell them what is wrong with it and that it is so bad that it is not worth
