*The ISM Code: A Practical Guide to the Legal and Insurance Implications* Phil Anderson, 2015-06-16 The ISM Code has been mandatory for almost every commercial vessel in the world for more than a decade and nearly two decades for high-risk vessels, yet there is

very little case law in this area. Consequently, there remains a great deal of confusion about the potential legal and insurance implications of the Code. This third edition represents a major re-write and addresses significant amendments that were made to the ISM Code on 1st July 2010 and 1st January 2015. This book provides practitioners with a practical overview of and much needed guidance on the potential implications of failing to implement the requirements of the Code. It will be hugely valuable to DPAs, managers of ship operating companies, ship masters, maritime lawyers and insurance claims staff. **The International Law of the Shipmaster** John A. C. **Resolutions and Other Decisions (resolutions 780-838)** International Maritime Organization, 1996. *18th SESSION 1993 (Resolution 733-779)*, 1994. *Oil Spills First Principles* B. Ornitz†, M. Champ, 2002-06-18. Marine oil spills are no longer considered unavoidable accidents resulting from adverse environmental conditions or functions of catastrophic events. More than 80% of all spills are the result of human error. The focus of the current legal, regulatory and convention framework affecting the transportation of oil by ship reflects a recent change in public attitude in which there is an insistence upon protection of the world's marine environments, particularly coastal ecosystems. The outcome of such global attention is the creation of significant legal and political motivators for a cultural shift by the oil shipping industry from an

evasion culture to a safety culture The new safety culture connotes continuous improvement in ship operations and a willingness to adopt the evolving concepts of communication at all levels better trained and qualified personnel on board ship emphasis of safety from top down and proactive institution of safety management systems Mere compliance with international and national laws is no longer sufficient for future sustainable shipping These changes and advancements in understanding the science and engineering of oil spills are the focus of this book on Oil Spills First Principles They are Prevention based upon adoption of the safety culture and Best Response utilizing scientific technical and environmental data and information Over the past 30 years billions of US dollars have been spent in R D planning response and clean up of oil spills All of these efforts have focused on achieving Best Response The concept of time periods of Technology Windows of Opportunity for a given response and clean up technology has developed from the leadership and wisdom of researchers and responders from many nations using modeling of the weathering of spilled oil and technology effectiveness The Windows of Opportunity strategy provides a scientific basis for policy and decision making in oil spill planning response and training A global paradigm shift is needed to more effectively utilize and expedite the application of lessons learned in both prevention and clean up Recognition of economic political and legal benefits accruing from environmental protection is good for business and critical for sustainable shipping

**The EU Maritime Safety Policy and International Law** Henrik Ringbom, 2008-09-30 This book offers a comprehensive international law analysis of the European Union's maritime safety legislation This is a relatively novel field of activity of the EU but its development has been very rapid Since 1993 over 40 acts of EU law have been adopted dealing with a variety of subjects such as port State control classification societies vessel traffic management ship construction environmental protection and pollution sanctions This legislation is analysed from the point of international law notably the law of the sea and the international maritime conventions Regional legislation in a field that is traditionally regulated primarily by means of international conventions is bound to create tensions with the related international conventions and with well established principles of international law This study assesses how the EU has acted as a flag State port State and coastal State and measures the trends in this development against the international legal framework More detailed legal analyses are offered for specific aspects of EU legislation that are considered to be particularly interesting from an international law point of view The relationship between EU law and international law within the internal EU legal system is also analysed from the specific perspective of maritime safety law

**Protocol of 1997 amending MARPOL Convention : message from the President of the United States...**, Anti-fouling Systems International Maritime Organization, 2005 The harmful effects of anti fouling systems were considered by the International Maritime Organization's Marine Environment Protection Committee MEPC for the first time in 1988 when the Paris Commission requested the MEPC to consider the need for measures to restrict the use of tributyltin TBT compounds on seagoing vessels As a first step the Committee at its thirtieth session in 1990 adopted resolution MEPC 46/30 on Measures to control potential adverse impacts associated with the use of tributyltin compounds in anti fouling paints which recommends that IMO Member Governments adopt measures to eliminate the use of anti fouling paint containing TBT on non aluminium hulled vessels of less than 25 m in length and eliminate the use of TBT based anti fouling paints with an average leaching rate of more than four micrograms of organotin per square centimetre per day These recommendations were intended to be interim measures until IMO could consider a possible total prohibition of TBT compounds in anti fouling systems From 1990 onwards MEPC was presented with TBT monitoring results which reconfirmed the toxicity of TBT compounds as well as with information on existing alternatives including their effectiveness and the risk posed to the marine environment by these systems This 2005 edition reproduces the texts of the International Convention on the Control of Harmful Anti Fouling Systems on Ships 2001 the four Conference resolutions and the Guidelines developed and adopted by the Organization

Proceedings of the Marine Safety & Security Council, 2016 Port State Control and Jurisdiction George C. Kasoulides, 2023-11-27 Nineteen ninety two provided several painful reminders of the inherent hazards of oil tankers plying the high seas loaded with millions of gallons of crude oil Within the space of a few days we witnessed a succession of catastrophic accidents the foundering of the Greek AEGEAN

SEA off the North West coast of Spain the breaking up of the Liberian BRAER off the Shetland Islands and the burning of the Danish owned MAERSK NAVIGATOR near the entrance to the Indian Ocean s Malaccan Strait Any one of these accidents could have been worse than the EXXON VALDEZ spill in Alaska in 1989 when 11 million gallons of crude oil leaked into Prince William Sound This once again demonstrated the imperative need for an improved regime for the prevention of this kind of accident The 1982 United Nations Convention on the Law of the Sea which had been ratified by 54 states by the end of 1992 consolidates a number of novel provisions one of which is port state enforcement for violations outside a state s jurisdiction Port state control as such is a very old concept It is based on the rule of international law according to which a state exercises full jurisdictional powers within its internal waters and has the right to deny access to such waters The 1982 Convention expands this jurisdiction and provides the port state with enforcement powers with respect to violations outside its national jurisdiction Special emphasis is paid to the evolution of the port state enforcement regime its formulation in the 1982 UN Convention on the Law of the Sea advantages and disadvantages and finally the implementation of the enforcement provisions of relevant maritime conventions This book also analyses flag state jurisdiction and the repercussions of the adoption of the 1986 Convention for Registration of Ships Special emphasis is given to a regional European agreement the 1982 Paris Memorandum of Understanding which attempts to strengthen the implementation of the existing international legal standards that could serve as a model for a future port state regime
