Schools's Networks Support

In the beginning of June 2015, 150 school pupils from Bishopbriggs Academy came onto campus to see what the university life is like. The day involved a skills session on identifying personal strengths as well as a talk from our ex-president Tom Bradley. It then proceeded with a case study scenario that each team had to present their solution to at the end.

Bishopbriggs Academy continues to run a successful Bright Futures society and the general feedback from both students and teachers was great. Our president Youssef Hounet was also involved in advising a number of schools committees in delivering their first events this year. He has worked closely with Mark O'Neill to ensure that these new committees have the necessary support in order to grow.

Finally, we are planning to run a committee training session for the schools' committees on campus in early June 2016. This will allow us to support a number of different schools in delivering their own developmental workshops and enables them to achieve a high level of committee capability.

Engagement with National Networks

We have managed to engage with the Bright Futures network as a whole in a number of ways. Firstly, by having representatives at every single national event, we have been able to meet with other societies and the national teams face to face and share ideas on how to develop and create high quality events.

One society we have worked closely with was Glasgow Celticonian University BC. As a newly formed society we have been able to provide them with advice on how to run events, engage with employers and work with students. They have flourished and thrived within their environment in order to create a dynamic and engaging society.

We have also done this through directly helping other societies when they have reached out to us, offering insight and practical advice on the organisation of events we have done before. Publishing articles in the Hired Edge is another method of knowledge sharing we have been able to facilitate.

The Right to Be Protected from Committing Suicide Jonathan Herring, 2022-06-16 This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to

prevent them attempting suicide Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying But of those wishing to die it is far more common to find middle aged men and young people oppressed by mental health and personal problems Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need This ground breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy

The Spaces In Between Tim Schouls, 2023-11-30

The Spaces In Between examines prospects for the enhanced practice of Indigenous political sovereignty within the Canadian state As Indigenous rights include the right to self determination the book contends that restored practices of Indigenous sovereignty constitute important steps forward in securing better relationships between Indigenous peoples and the Canadian state

While the Canadian state maintains its position of dominance with respect to the exercise of state sovereignty Tim Schouls reveals how Indigenous nations are nevertheless carving out and reclaiming areas of significant political power as their own By means of strategically acquired legal concessions through hard fought political negotiations and sometimes through simple declarations of intent Indigenous nations have repeatedly compelled the Canadian state to roll back its jurisdiction over them In doing so they have enhanced their prospects for political sovereignty within Canada As such they now increasingly occupy what Schouls refers to metaphorically as the spaces in between The book asserts that occupation of these jurisdictional spaces in between not only goes some distance in meeting the requirements of Indigenous rights but also contributes to Indigenous community autonomy and well being enhancing prospects for reconciliation between Indigenous peoples and the Canadian state
