A History of Medicine Arturo Castiglioni,2019-01-15 Originally published in 1941 A History of Medicine provides a detailed and comprehensive guide to the advancement of medicine from Ancient Egypt and Ancient Babylonia all the way up to the 20th century The book looks at the close relationship between the progress of medicine and its advancement of civilization it covers the development of medicine from old magical rites religious creeds classical Hippocratism and revolutionary discoveries while looking at the associated economic intellectual and political conditions of life in different nations during different times The book provides an essential and detailed look at the rich history of medicine and how it has impacted society

The Language of Medicine, Its Evolution, Structure, and Dynamics John H. Dirckx,1983

The Life Worth Living Joel Michael Reynolds,2022-05-17 A philosophical challenge to the ableist conflation of disability and pain More than 2 000 years ago Aristotle said let there be a law that no deformed child shall live This idea is alive and well today During the past century Supreme Court Justice Oliver Wendell Holmes Jr argued that the United States can forcibly sterilize intellectually disabled women and philosopher Peter Singer argued for the right of parents to euthanize certain cognitively disabled infants The Life Worth Living explores how and why such arguments persist by investigating the exclusion of and discrimination against disabled people across the history of Western moral philosophy Joel Michael Reynolds argues that this history demonstrates a fundamental mischaracterization of the meaning of disability thanks to the conflation of lived experiences of disability with those of pain and suffering Building on decades of activism and scholarship in the field Reynolds shows how longstanding views of disability are misguided and unjust and he lays out a vision of what an anti ableist moral future requires The Life Worth Living is the first sustained examination of disability through the lens of the history of moral philosophy and phenomenology and it demonstrates how lived experiences of disability demand a far richer account of human flourishing embodiment community and politics in philosophical inquiry and beyond

Aschengrau & Seage's Essentials of Epidemiology in Public Health Ann Aschengrau,2025-05-12 Seamlessly blending theory and practice

Aschengrau Seage's *Essentials of Epidemiology in Public Health* presents both traditional and modern epidemiological concepts in a clear and accessible way. Broad in scope, the text opens with five chapters covering the basic epidemiologic concepts and data sources. A major emphasis is placed on study design with separate chapters devoted to each of the three main analytic designs: experimental, cohort, and case-control studies. Full chapters on bias, confounding, and random error, including the role of statistics in epidemiology, ensure that students are well equipped with the necessary information to interpret the results of epidemiologic studies. For the 5th edition, descriptive data and statistics have been updated throughout, most significantly in Chapters 4, Sources of Public Health Data, and 5, Descriptive Epidemiology. The latter chapter also includes a section on the leading causes of morbidity in the U.S. with a summary of COVID-19.

Technology for Adaptive Aging. National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Steering Committee for the Workshop on Technology for Adaptive Aging, 2004-04-25. Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome? What problems must be solved for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful marketable products and services? *Technology for Adaptive Aging* is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education, and learning; employment; health; living environments; and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.
