Green Approaches in Medicinal Chemistry for Sustainable Drug Design Bimal Banik, 2020-03-27 Extensive experimentation and high failure rates are a well recognised downside to the drug discovery process with the resultant high levels of inefficiency and waste producing a negative environmental impact Sustainable and Green Approaches in Medicinal Chemistry reveals how medicinal and green chemistry can work together to directly address this issue After providing essential context to the growth of green chemistry in relation to drug discovery in Part 1 the book goes on to identify a broad range of practical methods and synthesis techniques in Part 2 Part 3 reveals how medicinal chemistry techniques can be used to improve efficiency mitigate failure and increase the environmental benignity of the entire drug discovery process whilst Parts 4 and 5 discuss natural products and microwave induced chemistry Finally the role of computers in drug discovery is explored in Part 6 Identifies novel and cost effective green medicinal chemistry approaches for improved efficiency and sustainability Reflects on techniques for a broad range of compounds and materials Highlights sustainable and green chemistry pathways for molecular synthesis

Non-Conventional Synthesis György Keglevich, Bubun Banerjee, 2023-11-06 Non conventional synthetic methods may provide new and green methods for the preparation of bioactive heterocycles These methods such as microwave and ultrasound assisted synthesis biocatalysis photochemistry and electrosynthesis use less energy and may produce less waste to get the desired products when compared to traditional methods This book explores the use of these methods when synthesizing various biologically relevant heterocyclic scaffolds

THE SERIES GREEN BIOACTIVE HETEROCYCLES Heterocycles are a widely utilized group of molecules as they often contain bioactivity that is useful in drug development agriculture and other applications However their synthesis remains challenging with difficult to control functional groups With a greater focus on sustainable synthesis practices there is a need to develop greener synthetic methods for the synthesis of structurally diverse bioactive heterocyclic scaffolds This series aims to do so by collecting developments into common themes

N-Sulfonated-N-Heterocycles Galal H. Elgemeie, Rasha A. Azzam, Wafaa A. Zaghary, Ashraf A. Aly, Nadia H Metwally, Mona O. Sarhan, Elshimaa M. Abdelhafez, Rasha E. Elsayed, 2022-08-30 N Sulfonated N Heterocycles covers the synthesis chemistry and biological applications of these compounds focusing on pioneering synthetic approaches mechanistic insights and their limitations as well as recent advances in this field The synthesis of some of N sulfonated N heterocycles and their transformation to other useful cyclic and acyclic compounds are discussed as well as their uses as useful intermediates in the preparation of polymeric and medicinal materials This book includes detailed methods and protocols and the focus on applications makes this resource an essential guide for all researchers in the area of organic medicinal and polymeric synthetic study Reviews the use of N sulfonated N heterocycles as important precursors for the synthesis of biologically active compounds Includes information on synthetically useful transformations of N sulfonated N heterocycles Covers a wide synthetic methods used for an important branch of

heterocycles and their biological evaluation in detail Features over 500 schemes to illustrate different synthetic pathways and reactions of N sulfonated N heterocycles

AI And Machine Learning In Pharmaceuticals Dr. K. ILANGO, Dr. P. VALENTINA, 2022-11-08 Artificial intelligence AI and machine learning ML have emerged over the last decade as the cutting edge technologies most expected to revolutionise the pharmaceutical R D industry Revolutionary developments in computer technology and the concomitant evaporation of earlier limits on the collection processing of enormous amounts of data are contributing factors Meanwhile the price of developing and delivering new medicines to the market for patients has skyrocketed Despite these challenges the pharmaceutical sector is interested in AI ML methods because of their predictivity automation and the efficiency boost that is projected as a result Over the last 15 20 years ML techniques have been increasingly used in the drug development process Clinical trial design conduct and analysis are the most recent areas of drug research to see beneficial disruption from AI ML Due to the rising dependence on digital technology in the execution of clinical trials the COVID 19 pandemic could further drive the employment of AI ML in clinical trials Getting through the associated buzzwords and noise is crucial as we progress toward a future where AI ML is more integrated into R D Similarly crucial is the acknowledgement that the scientific method is still relevant for concluding evidence By doing so we can better evaluate the potential benefits of AI ML in the pharmaceutical industry and make well informed decisions on the best use The purpose of this paper is to clarify important ideas provide examples of their application and provide a well rounded perspective on how to best use AI ML techniques in research and development
