Cognitive Remediation for Brain Injury and Neurological Illness Marvin H Podd, 2011-11-04 The purpose of this book is to teach psychologists with a neuropsychology background about cognitive remediation the evidence in the research literature and how to develop and conduct a treatment plan and evaluate the effectiveness of the interventions The approach is illustrated using the computer assisted cognitive remediation program developed by the author NeurXercise Twenty nine different cases are presented in depth following the outline presented in the earlier portions of the book Treatment planning emphasizes Luria s concepts of alternate functional systems and double dissociation Pre and post treatment neuropsychological testing results are presented along with ecological validity and

generalization to daily functioning The cases are presented by etiology and each section concludes with what can be learned about that etiologic process from the cognitive remediation results This section includes blast injuries which are still being characterized in the literature as well as effective treatment of patients with head injury stroke post neurosurgical sequelae co morbid disorders subcortical disorders attention deficit disorder and learning disabilities The book identifies the most commonly used neuropsychological test instruments for evaluating cognitive deficits discusses their input and output characteristics and does the same for the NeurXercise computer based exercises so that the connection between testing and treatment is easy to see and develop In addition to discussing this in the appropriate sections of the book these are summarized in the appendixes as a reference for correlating test findings and appropriate exercises for remediating deficits

Dynamics of Sensorimotor Interactions in Embodied Cognition Guillaume T. Vallet,Benoit Riou,Lionel

Brunel,Nicolas Vermeulen,2016-04-15 We interact with our environment through perception and action Perception is based on sensory components while actions are based on motor components It is commonly accepted that these sensorimotor components constitute the foundation of knowledge i e percepts and concepts action and emotion However whether or not these components remain part of knowledge action and emotion is still being debated see Glenberg Witt Corveleyn Lopez Moliner Vermeulen et al 2013 Despite the accumulation of empirical evidence showing that perception memory action and emotion interact together less is known about the dynamics of these interactions It remains to precise the temporal dynamic when these interactions occur the neural underlying networks and the factors that modulate these interactions The present research topic focuses on the dynamic relationship between present and absent sensorimotor components across perception memory action and emotion in a grounded cognition perspective This research topic aims 1 to demonstrate the validity of the embodied cognition theories 2 to highlight the dynamics of emergence of conceptual knowledge action and emotion 3 to provide a comprehensive state of the art theoretical explanation and or models *Resources for Preparing Middle School Mathematics Teachers* Cheryl Beaver,Laurie J.
