**Hidden Geographies** Marko Krevs, 2021-10-21 This book defines and discusses the term hidden geographies in two ways systematically and by presenting a variety of examples of the research fields and topics concerning hidden geographies with the aim of stimulating further basic and applied research in this area While the term is quite rarely used in the scientific literature more often as a figure of speech than to illustrate or problematize its deeper meaning we argue that hidden geographies are everywhere and many of them have significant impacts on other natural and social phenomena and processes subsequently triggering changes for example in landscape economy culture health or quality of life The introductory section of the book conceptualises hidden geographies and discusses cognitive geography symbolization of space and the hidden geographies in mystical literature Case studies of hidden environmental geographies address soils air pollution coastal pollution and the allocation of an astronomical tourism site Revealing hidden historical and sacred places is illustrated through examples of the visualisation of the subterranean mining landscape the analysis of the historical road network and trade border stones and historical spatial boundaries and the monastic Carthusian space Hidden urban geographies are discussed in terms of the urban development of an entire city presenting the role of geography in rescuing architecture revealing illegal urbanisation and the quality of habitation in Roma neighbourhoods Case studies of hidden population geographies shed light on the ageing of rural populations and the impact of spatial demographic disparities on fertility variations Discussions of hidden social and economic geographies problematize recent social changes and conflicts in a country present the implementation of the fourth industrial revolution and borders as hidden obstacles in the organisation of public transport Hidden geographies are explicitly linked to perceptions and explanations in case studies that address local responses to perceived marginalisation in a city the solo women travellers perceived risk and safety and hidden geographical contexts of visible post war landscapes The book brings such a diversity of views ideas and examples related to hidden geographies that can serve both to deepen their understanding and their various impacts on our lives and environment and to attract further cross disciplinary interest in considering hidden geographies in

research and in our every day lives      **Explorations in Urban Design** Professor Matthew Carmona, 2014-05-28 This book advances an interdisciplinary and innovative approach to urban design whilst recognising that distinctly different traditions exist within its study and practice It informs users who are grappling with urban design research problems but who need the inspiration to move from idea to methodological approach Through the work of 32 urban researchers from the arts sciences and social sciences it demonstrates a wide range of problems and approaches and shows how the diverse range of complementary approaches can come together to provide a holistic understanding to the design of cities      **Architecture & Sustainable Development (vol.2)** Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries      **Jakob and MacFarlane** Daniel Pavlovits, 2006 The work of Paris based architects Jakob MacFarlane can best be described as the capture and articulation of movement both ethereal and real The firm's focus on movement seeks to mobilise vectors of force to infuse a dynamic sensibility in its work evident in well known projects such as Restaurant Georges at the Pompidou Centre and the Florence Loewy Bookshop both in Paris The firm's sophisticated design schemes are the result of high end digital computer technology used in its design process Jakob MacFarlane's work has been published and exhibited widely and it has been proclaimed as a highly promising collaborative representing the best in French architecture and architectural sensibility of the twenty first century This book explores a variety of Jakob MacFarlane's projects to date both built and unbuilt allowing the reader an insight into the workings of a burgeoning practice      **exlibris** Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices far an ultimate legitimation In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences      *Ambient Screens and Transnational Public Spaces* Nikos Papastergiadis, 2016-07-01 Large public screens have now become a ubiquitous part of the contemporary cityscape Far from being simply oversized televisions the media experts contributing to *Ambient Screens and Transnational Public Spaces* put forward a strong case that such screens could serve as important sites for cultural exchange Advances in digital technology spell the possibilities of conducting mobile modes of interaction across national boundaries and in the process expose the participants to novel sensory experiences giving rise to a new form of public culture Understanding this phenomenon calls for a reconceptualization of public space and ambience as well as connecting the two concepts with each other This pioneering study of the impact of media platforms on urban cultural life presents a theoretical analysis and a history of screens followed by discussions of site specific urban screen practices on five continents There is also a substantial examination of the world's first real time cross cultural exchange via the networking of large public screens located in

 Information Technology is imposing itself as the central paradigm for a new phase in all of architecture the dynamic  
 interconnections at the heart of IT are being transferred from the world of digital models to the reality of a reactive sensitive  
 interactive architecture The structure chosen for this book was to avoid a crib sheet on the IT Revolution in Architecture The  
 formula of the treatise was just as impossible to use not only because many aspects of contemporary scientific research are  
 oriented toward a structure that remains intentionally open and serves to launch new hypotheses rather than solidify

certainties but also because this aspect is reinforced by the material that by its nature finds itself in an free interconnected intrinsically problematic dimension

**Virtual Aesthetics in Architecture** Sara Eloy, Anette Kreutzberg, Ioanna Symeonidou, 2021-08-30 Virtual Aesthetics in Architecture Designing in Mixed Realities presents a curated selection of projects and texts contributed by leading international architects and designers who are using virtual reality technologies in their design process It triggers discussion and debate on exploring the aesthetic potential and establishing its language as an expressive medium in architectural design Although virtual reality is not new and the technology has evolved rapidly the aesthetic potential of the medium is still emerging and there is a great deal more to explore The book provides a comprehensive overview of the current use of virtual reality technologies in the architectural design process Contributions are presented in six parts fully illustrated with over 150 images Recent projects presented are distributed in five themes introduction to mixed realities space and form context and ambiguity materiality and movement body and social Each theme includes richly illustrated essays by leading academics and practitioners including those from Zaha Hadid Architects and MVRDV detailing their design process using data driven methodologies Virtual Aesthetics in Architecture expands the use of technology per se and focuses on how architecture can benefit from its aesthetic potential during the design process A must read for practitioners academics and students interested in cutting edge digital design

*Wiring the Streets, Surfing the Square* Timothy Jachna, 2021-03-18 This book investigates the production of public space in contemporary urban contexts as conditioned by the suffusion of urban life with digital technologies A social production of technology approach is taken to frame the digitally mediated city as a communal social and cultural project Acknowledging the multivalent and shifting nature of public space and the heterogeneity of the urban actors who form it the agency of these different actors in appropriating digital technologies takes center stage The dynamics of negotiations between regimes of control and impulses towards freedom and experimentation the entanglement of the spatial commons and the digital commons changes in the notions of what constitutes membership in a public or counterpublic and evolving relationships between the various individuals and groups who share and constitute public space are all revealed in different actors appropriation of digital technologies in the formation of public spaces and the conducting of public life in cities The book is divided into two sections Drawing on classic and contemporary scholars on public space and on digital culture Section I explores the implications of the convergence of these bodies of knowledge and lenses of critique and examination on the present urban condition establishing a conceptual foundation upon which public space discourse is brought to bear on an interrogation of the wired or mediated city Structured by the core concepts that underlie Hannah Arendt's notion of agency in the constitution of the public sphere Section II is devoted to discussing and demonstrating through myriad concrete examples how different affordances of digital technologies are implicated in the production of public space and in the interplay between urban governance and control urban life and citizenship and urban commodification The topics in this book are of broad and

current international relevance and will appeal to scholars and students in architecture urbanism design sociology and digital culture
