presented through a series of big questions models that show how to pose a questions rigorously and work toward an answer This book helps readers master economic concepts and techniques by tackling fundamental economic and political questions through a series of models It is organized around a sequence of big questions among them When do markets help translate individuals uncoordinated selfish actions into outcomes that are best for all Do markets change people and if so for worse or better Translated into the language of modern economics do Marx s ideas have merit Why is there so much income inequality Or is there too little The arguments are in the theorem proof format distinguishing results derived in the context of fully specified models from educated speculation Readers will learn how to pose a question rigorously and how to work toward an answer and to appreciate that even especially the broadest and most ambitious questions call for a model The goal of the book is not to indoctrinate but to show readers how to reason toward their own conclusions The first chapter on the Walrasian model of general equilibrium serves as the prerequisite for the rest of the book The remaining chapters cover less conventional topics including the morality of markets matching theory Marxism socialism and the resilience of markets a formalization of Kant s categorical imperative unintended consequences of policy design and theories of justice The book can be used as a textbook for advanced undergraduate or graduate students or as a resource for researchers in disciplines that draw on normative economics

Generative Artificial Intelligence Mitja Kovač, 2025-01-07 This book takes a comparative law and economics approach to explore the role of public and private actors in regulating generative artificial intelligence The book provides an introduction and context for the creation of new generative AI technologies now understood to be the chief goal of the leading AI companies As autonomous super intelligences these technologies are still an unknown entity which nevertheless have profound implications for liberal democracy consumer choice mechanisms mutual trust and political legitimacy This book explores the deep challenges posed for lawmakers and how we can achieve an optimal form of regulation and governance of such unreliable technologies Chapters investigate possible hybrid modes of regulation such as a co regulatory approach between private AI companies and public actors in addressing the issue of misinformation spread It also explores mixed types of regulation toward research on new forms of AI arguing that different levels of systemic risk posed by different technologies must be accounted for Different contemporary and historical contexts for the regulation of unprecedented technical innovation are also considered and new suggestions for policy are presented This book is a timely resource which will be of interest to researchers and practitioners in economic governance law and regulation artificial intelligence and comparative law

*Judgement-Proof Robots and Artificial Intelligence* Mitja Kovač, 2020-09-03 This book addresses the role of public policy in regulating the autonomous artificial intelligence and related civil liability for damage caused by the robots and any form of artificial intelligence It is a very timely book focusing on the consequences of judgment proofness of autonomous decision making on tort law risk and safety regulation and the incentives stemming from these This book is extremely important as regulatory endeavours concerning AI are in their infancy at most whereas the industry's development is continuing in a strong way It is an important scientific contribution that will bring scientific objectivity to a to date very one sided academic treatment of legal scholarship on AI

**Homo Curator: Towards the Ethics of Consumption** Péter Róna, László Zsolnai, Agnieszka

Winiewicz-Price, 2024-02-20 This book explores the under researched sources of the consumerist culture and the environmental damage it has brought about The book is an outcome of the symposium on The Ethics of Consumption organised and hosted by the Las Casas Institute at the Blackfriars Hall University of Oxford as part of its Economics as a Moral Science Programme It takes on two contemporary problems the human weakness and capacity for wrong doing and the failure of modern economic theory to account for the moral character of human behaviour and its implicit encouragement of gluttonous life styles In a time when grand political schemes are proposed to revive sustainability of global economy the authors of the papers collected in this book highlight the need for moral renewal without which the most revolutionary structural reforms are bound to fail at producing the desired outcome Topics of the book include the meaning and sources of

avarice the attempt to define what is enough exploration of philosophical and theological perspectives which can serve as building blocks for the ethics of consumption This makes the book of great interest to a broad readership of economists social scientists and philosophers      *Economic Growth and the Environment* Clas Eriksson,2013-04-25 How can we reconcile economic growth with the need to protect the natural environment Will scarcity of natural resources eventually force economic growth to cease This book introduces key models and shows how modern growth theory can be used to shed light on the relation between economic growth natural resources and the environment      Principles of Conflict Economics Charles H. Anderton,John R. Carter,2009-03-16 Conflict economics contributes to an understanding of violent conflict in two important ways First it applies economic analysis to diverse conflict activities such as war arms races and terrorism showing how they can be understood as purposeful choices responsive to underlying incentives Second it treats appropriation as a fundamental economic activity joining production and exchange as a means of wealth acquisition Drawing on a half century of scholarship this book presents a primer on the key themes and principles of conflict economics Although much work in the field is abstract the book is made accessible to a broad audience of scholars students and policymakers by relying on historical data relatively simple graphs and intuitive narratives In exploring the interdependence of economics and conflict the book presents current perspectives of conflict economics in novel ways and offers new insights into economic aspects of violence      Managerial Economics, 10th Edition Dwivedi D.N., Managerial Economics has stood the test of time for the last 45 years because of the quality of presentation of its text It has become students favourite as it provides the latest theories thoughts and applications on the subject with timely revisions to stay up to date all the time Since its first edition it has provided complete comprehensive and authentic text on micro and macro aspects of managerial economics It has now been revised thoroughly by addressing the real world complexities of applying these theories to managerial decisions Key to this edition is the introduction of 17 carefully chosen Case Studies that demonstrate the practical application of abstract economic concepts These case studies are strategically placed in the text to enhance the learning experience offering insights into the nuanced decision making processes in varied business contexts Significantly this edition introduces an entirely new Part VII focusing on Theories of Economic Growth and Business Cycles This part delves into detailed discussions on economic growth and the dynamics of business cycles reflecting our commitment to depth and applicability      Economics of Higher Education Robert K. Toutkoushian,Michael B. Paulsen,2016-03-18 This book examines the many ways in which economic concepts theories and models can be used to examine issues in higher education The topics explored in the book include how students make college going decisions the payoffs to students and society from going to college markets for higher education services demand and supply in markets for higher education why and how state and federal governments intervene in higher education markets college and university revenues and expenditures how institutions use net pricing strategies and non price product differentiation strategies to pursue their goals and to compete in higher education markets

as well as issues related to faculty labor markets The book is written for both economists and non economists who study higher education issues and provides readers with background information and thorough explanations and illustrations of key economic concepts In addition to reviewing the contributions economists have made to the study of higher education it also examines recent research in each of the major topical areas The book is policy focused and each chapter analyses how contemporary higher education policies affect the behaviour of students faculty and or institutions of higher education Toutkoushian and Paulsen attempted a daunting task to write a book on the economics of higher education for non economists that is also useful to economists A book that could be used for reference and as a textbook for higher education classes in economics finance and policy They accomplish this tough balancing act with stunning success in a large volume that will serve as the go to place for anyone interested in the history and current thinking on the economics of higher education William E Becker Jr Professor Emeritus of Economics Indiana University
