Schlungbaum,W. Zaunbauer,A. Zuppinger,2013-03-12 Human Nature and Public Policy A. Somit,S. Peterson,2003-07-03 Arguing for an evolutionary perspective this book directly challenges the Standard Social Science Model SSSM on which public policy has often been based The SSSM maintains that human behavior is solely the product of culture and learning In sharp contrast the Evolutionary Model EM holds that our behavior flows from the interaction between learning and culture on the one hand and biological factors especially our evolutionary legacy on the other These different approaches to human behavior understandably lead to divergent conceptions of sound domestic and foreign policy The SSSM views human behavior as essentially plastic and thus readily changed by governmental action Disagreeing the Evolutionary Model sees that

malleability as seriously limited by our species evolved propensity for aggression status seeking xenophobia ethnocentrism and hierarchical social structures
